

UK MIFIR product governance / Retail investors, professional investors and ECPs target market – Solely for the purposes of the manufacturer’s product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is retail clients, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (“EUWA”), and eligible counterparties, as defined in the FCA Handbook Conduct of Business Sourcebook (“COBS”) and professional clients, as defined in Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA (“UK MiFIR”); EITHER (ii) all channels for distribution to eligible counterparties and professional clients are appropriate; and (iii) the following channels for distribution of the Notes to retail clients are appropriate – investment advice, and portfolio management, non-advised sales and pure execution services, subject to the distributor’s suitability and appropriateness obligations under COBS, as applicable. Any person subsequently offering, selling or recommending the Notes (a “distributor”) should take into consideration the manufacturer’s target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the “UK MiFIR Product Governance Rules”) is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer’s target market assessment) and determining appropriate distribution channels, subject to the distributor’s suitability and appropriateness obligations under COBS, as applicable.

PART A – CONTRACTUAL TERMS

This document constitutes Final Terms relating to the issue of Notes described herein.

Terms used herein shall be deemed to be defined as such for the purposes of the Terms and Conditions of the Notes set forth in the Base Prospectus dated 7 July 2022 and the supplements dated 27 July 2022, 26 August 2022, 21 October 2022, 3 November 2022, 18 November 2022, 23 January 2023 and 17 March 2023 to the Base Prospectus which together constitutes a base prospectus (the “**Base Prospectus**”) for the purposes of the UK version of Regulation (EU) No 2017/1129 of the European Parliament and of the Council of 14 June 2017 on the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market, and repealing Directive 2003/71/EC, which is part of UK law by virtue of the European Union (Withdrawal) Act 2018 (as supplemented from time to time) (the “**UK Prospectus Regulation**”). This document constitutes the Final Terms of the Notes described herein for the purposes of Article 8 of the UK Prospectus Regulation and must be read in conjunction with the Base Prospectus as so supplemented. Full information on the Issuer and the offer of the Notes is only available on the basis of the combination of these Final Terms and the Base Prospectus. However, a summary of the Issue is annexed to these Final Terms. Copies of the Base Prospectus and any supplement(s) thereto are available from the offices of MSI plc at 25 Cabot Square, Canary Wharf, London, E14 4QA and on the Issuers' website at <http://sp.morganstanley.com/EU/Documents> and copies of the Base Prospectus and any supplement(s) thereto and these Final Terms are available on the website of the Luxembourg Stock Exchange at www.bourse.lu

6.

PERFORMANCE OF UNDERLYING/[EXPLANATION OF EFFECT ON VALUE OF INVESTMENT AND ASSOCIATED RISKS AND OTHER INFORMATION CONCERNING THE UNDERLYING

The value of the Notes is linked to the positive or negative performance of the FTSE 100® Index (Bloomberg Code: UKX Index). An increase in the level of the FTSE 100® Index will have a positive effect on the value of the Notes, and a decrease in the level of the FTSE 100® Index will have a positive effect on the value of the Notes.

The redemption amount payable on the Notes is dependent on the value or performance of the Relevant Underlying reaching a threshold or barrier and a small increase or decrease in the value or performance of the Relevant Underlying near to the threshold or barrier may lead to a significant increase or decrease in the return of the Notes.

The redemption amount payable on the Notes is linked to the value or performance of the Relevant Underlying as of one or more predefined dates and, irrespective of the level of the Relevant Underlying between these dates, the values or performance of the Relevant Underlying on these dates will affect the value of the Notes more than any other factor.

The Final Redemption Amount payable on the Notes is linked to a specified percentage of the performance of the Relevant Underlying and Noteholders may not receive the amount initially invested, and may receive a significantly lesser amount.

The market price or value of the Notes at any time is expected to be affected by changes in the value of the Relevant Underlying to which the Notes are linked.

The market price or value of the Notes could, in certain circumstances, be affected by fluctuations in the actual or anticipated rates of dividend (if any) or any other distributions on the Relevant Underlying.

The Issuer does not intend to provide post-issuance information.

7. OPERATIONAL INFORMATION

B.3 *What are the key risks that are specific to the Issuer?*

The materialisation of one or more of the following risks may prevent the Issuer [and/or the Guarantor] from fulfilling [its][their respective] obligations in relation to the Notes.

A. Risk Relating to the Issuer and Guarantor

Holders of Notes issued by the Issuer bear the credit risk of the relevant Issuer and/or the Guarantor, that is the risk that the relevant Issuer and/or the Guarantor is not able to meet its obligations under such Notes, irrespective of how any principal, interest or other payments under Notes are to be calculated. If the Issuer and/or the Guarantor is not able to meet its obligations under the Notes, then that would have a significant negative impact on the investor's return on the Notes and an investor may lose up to its entire investment.

B. Risks relating to Morgan Stanley

The following key risks affect Morgan Stanley and, since Morgan Stanley is the ultimate holding company of MSBV also impact MSBV.

Risks relating to the financial situation of Morgan Stanley

Morgan Stanley's results of operations may be materially affected by market fluctuations and by global financial market and economic conditions and other factors. Holding large and concentrated positions may expose Morgan Stanley to losses. These factors may result in losses for a position or portfolio owned by Morgan Stanley.

Morgan Stanley is exposed to the risk that third parties that are indebted to it will not perform their obligations, as well as that a default by a large financial institution could adversely affect financial markets. Such factors give rise to the risk of loss arising when a borrower, counterparty or issuer does not meet its financial obligations to Morgan Stanley.

Liquidity is essential to Morgan Stanley's businesses and Morgan Stanley relies on external sources to finance a significant portion of its operations. Morgan Stanley's borrowing costs and access to the debt capital markets depend on its credit ratings. Morgan Stanley is a holding company and depends on payments from its subsidiaries and Morgan Stanley's access to assets held by subsidiaries may be restricted. Further, Morgan Stanley's liquidity and financial condition have in the past been, and in the future could be, adversely affected by U.S. and international markets and economic conditions. As a result of the foregoing, there is a risk that Morgan Stanley will be unable to finance its operations due to a loss of access to the capital markets or difficulty in liquidating its assets.

Risks relating to the operation of Morgan Stanley's business activities

Morgan Stanley is subject to operational risks, including a failure, breach or other disruption of its operations or security systems or those of Morgan Stanley's third parties (or third parties thereof), as well as human error or malfeasance, which could adversely affect its businesses or reputation. A cyber-attack, information or security breach or a technology failure of Morgan Stanley's or of third parties could adversely affect Morgan Stanley's ability to conduct its business, manage its exposure to risk or result in disclosure or misuse of confidential or proprietary information and otherwise adversely impact its results of operations, liquidity and financial condition, as well as cause reputational harm.

Morgan Stanley's risk management strategies, models and processes may not be fully effective in mitigating its risk exposures in all market environments or against all types of risk, which could result in unexpected losses. Further, the replacement of London Interbank Offered Rate and replacement or reform of other interest rate benchmarks could adversely affect Morgan Stanley's business, financial condition and results of operations.

Legal, Regulatory and Compliance Risk

Morgan Stanley is subject to the risk of legal or regulatory sanctions, material financial loss including fines, penalties, judgments, damages and/or settlements, limitations on its business, or loss to reputation it may suffer as a result of its failure to comply with laws, regulations, rules, related self-regulatory organization standards and codes of conduct applicable to its business activities. Morgan Stanley is also subject to contractual and commercial risk, such as the risk that a counterparty's performance obligations will be unenforceable. Additionally, Morgan Stanley is subject to anti-money laundering, anti-corruption and terrorist financing rules and regulations.

Other risks relating to Morgan Stanley's business activities

Morgan Stanley faces strong competition from financial services firms and others, which could lead to pricing pressures that could materially adversely affect its revenue and profitability. Further, automated trading markets may adversely affect Morgan Stanley's business and may increase competition.

Morgan Stanley is subject to numerous political, economic, legal, tax, operational, franchise and other risks as a result of its international operations (including risks of possible nationalization, expropriation, price controls, capital controls, exchange controls, increased taxes and levies, cybersecurity, data transfer and outsourcing restrictions, prohibitions on certain types of foreign and capital market activities, limitations on cross-border listings and other restrictive governmental actions, as well as the outbreak of hostilities or political and governmental instability, including tensions between China and the U.S.) which could adversely impact its businesses in many ways.

Morgan Stanley may be unable to fully capture the expected value from acquisitions, divestitures, joint ventures, partnerships, minority stakes or strategic alliances.

The application of regulatory requirements and strategies in the United States or other jurisdictions to facilitate the orderly resolution of large financial institutions may pose a greater risk of loss for Morgan Stanley's security holders and subject Morgan Stanley to other restrictions.

Additionally, the risks of climate change and related environmental sustainability matters could cause physical risk to Morgan Stanley's assets or pose transition risks that may result in increased costs and risks and adversely affect Morgan Stanley's operations, businesses and clients.

C. Risks relating to MSBV

All material assets of MSBV are obligations of (or securities issued by) one or more Morgan Stanley Group companies. If any of these Morgan Stanley Group companies incurs losses with respect to any of its activities (irrespective of whether those activities relate to MSBV or not) the ability of such company to fulfil its obligations to MSBV could be impaired, thereby exposing holders of securities issued by MSBV to a risk of loss.

C.3.4	<i>Most material risk factors pertaining to the Guarantor</i>												
The most material risk factors pertaining to Morgan Stanley are listed under section B.3 “ <i>What are the key risks that are specific to the Issuer?</i> ” above.													
C.4	What are the key risks that are specific to the Notes?												
<p>The Notes are not deposits or savings accounts and are not insured by the U.S. Federal deposit insurance corporation, the UK Financial Services Compensation Scheme, or any other governmental agency or instrumentality or deposit protection scheme anywhere, nor are they obligations of, or guaranteed by, a bank. Investors may lose all or a substantial portion of their investment if the value/performance of the Relevant Underlying does not move in the anticipated direction.</p> <p>The terms of certain Notes differ from those of ordinary debt securities because the Notes may not pay interest and, on maturity, depending on the performance of the Relevant Underlying, may return less than the amount invested or nothing, or may return assets or securities of an issuer that is not affiliated</p>													

with the Issuer, the value of which is less than the amount invested. The price of the Notes may fall in value as rapidly as it may rise, and investors in the Notes may potentially lose all of their investment.

Morgan Stanley's ability [to make payments on the Notes]/[to make payments with respect to the Guarantee] depends upon its receipt of dividends, loan payments and other funds from its subsidiaries. Direct creditors of any subsidiary will have a prior claim on the subsidiary's assets, if any, and Morgan Stanley's rights and the rights of its creditors, including [a Noteholder's rights as an owner of the Notes]/[a Noteholder's rights under the Guarantee], will be subject to that prior claim, except to the extent that any claims Morgan Stanley may have as a creditor of that subsidiary are paid. This may result in a Noteholder suffering a loss of all, or substantial portion, of its initial investment.

It is impossible to predict how the level of the Relevant Underlying will vary over time. The historical performance value (if any) of the Relevant Underlying does not indicate the future performance of the Relevant Underlying. Factors such as volatility, [distributions on the Relevant Underlying,] interest rates, remaining term of the Notes or exchange rates will influence the price investors will receive if an investor sells its Notes prior to maturity.
