IMPORTANT NOTICES

This Prospectus has been prepared on the basis that offers are not made within an exemption from the requirement to publish a prospectus under Article 1(4) of the Prospectus Regulation (a “Non-exempt Offer”). Any person making or intending to make a Non-exempt Offer of Securities on the basis of this Prospectus must do so only with the Issuer’s consent – see “Consent to the use of the Prospectus in connection with Non-exempt Offers” in the section entitled “General Information” below.

The Securities may not be a suitable investment for all investors

An investment in the Securities entails certain risks, which vary depending on the specification and type or structure of the Securities.

Each potential investor should determine whether an investment in the Securities is appropriate in such potential investor's particular circumstances. An investment in the Securities requires a thorough understanding of the nature of the relevant transaction. Potential investors should be experienced with respect to an investment in the Securities and be aware of the related risks.

An investment in the Securities is only suitable for potential investors who:

- have the requisite knowledge and experience in financial and business matters to evaluate the merits and risks of an investment in the Securities and the information contained in, or incorporated by reference into, this document;
- have access to, and knowledge of, appropriate analytical tools to evaluate such merits and risks in the context of the potential investor's particular financial situation and to evaluate the impact the Securities will have on their overall investment portfolio;
- understand thoroughly the terms of the Securities and are familiar with the behaviour of the Relevant Underlying and financial markets;
- are capable of bearing the economic risk of an investment in the Securities until the maturity date of the Securities;
- recognise that it may not be possible to dispose of the Securities for a substantial period of time, if at all before the maturity date; and
- are familiar with the behaviour of the Relevant Underlying and relevant financial markets and be able to evaluate (either alone or with the help of a financial and legal adviser) possible scenarios for economic, interest rate and other factors that may affect the potential investor's investment and its ability to bear the applicable risks.

The Securities are complex financial instruments. Sophisticated institutional investors generally do not purchase complex financial instruments as stand-alone investments. They purchase complex financial instruments as a way to reduce risk or enhance yield with an understood, measured, appropriate addition of risk to their overall portfolios. A potential investor should not invest in any Securities unless such potential investor has the expertise (either alone or with a financial and legal adviser) to evaluate how the Securities will perform under changing conditions, the resulting effects on the value of the Securities and the impact this investment will have on the potential investor's overall investment portfolio. The Issuer, the Guarantor and Morgan Stanley & Co. International plc as Distribution Agent, disclaims any responsibility to advise prospective investors of any matters arising under the law of the country in which they reside that may affect the purchase of, or holding of, or the receipt of payments or deliveries on, the Securities.

C.3.4 *Most material risk factors pertaining to the Guarantor*

The most material risk factors pertaining to Morgan Stanley are listed under section B.3 "What are the key risks that are specific to the Issuer?" above.

C.4 *What are the key risks that are specific to the Securities?*

- **The Securities may be redeemed prior to maturity:** If an event of default occurs in respect of the Issuer, investors would have an unsecured claim against the Issuer for the amount due on the early redemption of the Securities.
- **The value of the Securities may be influenced by unpredictable factors:** The market price or value of the Securities is expected to be affected primarily by changes in the Relevant Underlying. It is impossible to predict how the level of the Relevant Underlying will vary over time. The historical performance value of the Relevant Underlying does not indicate the future performance of the Relevant Underlying. Factors such as volatility, interest rates, remaining term of the Securities or exchange rates will influence the price investors will receive if an investor sells its Securities prior to maturity. While the market value of the Securities is linked to the Relevant Underlying, any change may not be comparable or proportionate.
- **No benefit of any cross-default or cross-acceleration with other indebtedness of MSBV or Morgan Stanley; A Morgan Stanley covenant default or bankruptcy, insolvency or reorganization event does not constitute an Event of Default:** The Securities will not have the benefit of any cross-default or cross-acceleration with other indebtedness of MSBV or Morgan Stanley (as applicable). In addition, a covenant default by Morgan Stanley, as guarantor, or an event of bankruptcy, insolvency or reorganization of Morgan Stanley, as guarantor, does not constitute an event of default with respect to the Securities.
- **Secondary trading of the Securities may be limited:** Potential investors should be willing to hold the Securities until maturity. There may be little or no secondary market in the Securities.

- ***The Issuer may amend the terms and conditions of the Securities, the Guarantee and the applicable Deed of Covenant without Securityholder consent:*** The Issuer may amend the terms and condition of the Securities, the Guarantee and the deed of covenant dated 17 July 2013 (as amended or supplemented from time to time) in relation to, amongst others, the Securities, without Securityholder consent if, in its opinion, such amendments are not materially prejudicial to Securityholders.
- ***The Securities are linked to an index:*** Factors affecting the performance of the Relevant Underlying may adversely affect the value of the Securities. An affiliate of the Issuer is the sponsor of the Relevant Underlying. Hedging activity by the sponsor may affect the level of the Relevant Underlying. The Issuer or an affiliate of the Issuer may also exercise discretion in limited circumstances in respect of the Relevant Underlying, which could adversely affect the level of the Relevant Underlying and present the Issuer or its affiliate with a conflict of interest. The Issuer or its affiliate is not required to take the interest of investors into account and will have no liability for making any determinations in these circumstances.
- ***Underlying Performance:*** The Final Redemption Amount includes a component which is calculated as the product of (x) the Participation Rate and (y) the higher of zero per cent. and the Underlying Performance. Investors in the Securities will only receive this component if the Underlying Performance is a positive number. The Underlying Performance involves a comparison of (i) the Initial Reference Value (being the Relevant Underlying Value observed on the Strike Date) and (ii) the Final Average Value (being the arithmetic mean of the value of the Relevant Underlying as on each Averaging Date, as determined on the Determination Date).
- ***Averaging:*** The Final Average Value is determined based on the arithmetic mean of the values of the Relevant Underlying on each Averaging Date. This will limit the extent to which a sudden increase in value or performance of the Relevant Underlying on a single date affects the Final Average Value (and therefore the Underlying Performance).
- ***The Relevant Underlying is adjusted by a certain deduction in the Index level:*** Notional embedded costs in the form of a Funding Rate and a Running Rate are included within the Relevant Underlying and will reduce the level of the Relevant Underlying.

9.5 **Risks pertaining to the MS Nordic Equity Fund 13% Index**

- a. **Indices linked to the performance of funds** - Investments offering direct or indirect exposure to the performance of funds are generally considered to be particularly risky and may bear similar risks, including but not limited to, market risks in relation to a direct investment in funds.

Financial Product Investors should also be aware that if one or more events occurs in relation to the Fund or any Fund Service Provider, including the insolvency of the Fund or Fund Service Provider, the Index Sponsor shall determine whether the procedures under Section 10.1 (*Adjustment Events*) of the Description will apply. Taking any actions pursuant to such procedures may have an adverse effect on the return and risk profile of Financial Products and consequently, the value of such Financial Products and the return on any Financial Product may be considerably less than that originally anticipated by a Financial Product Investor.

- b. **No duty to monitor the occurrence of Fund Events** – No member of the Morgan Stanley Group has the obligation to monitor or determine if a Fund Event has occurred at any time or to take any action in respect thereof. In certain circumstances it may be the case that if action were taken by the Index Sponsor at a different time or at all, the terms of any adjustment or other consequential determination made in respect of the Index would have resulted in a higher return to Financial Product Investors.

- c. **Investment risks in relation to funds** – Financial Product Investors should note that there are substantial risks in directly or indirectly investing in funds including, without limitation, the following:

- (i) different types of funds are subject to differing levels of regulatory supervision;
- (ii) funds may have varying restrictions on leverage. Leverage presents the potential for a higher rate of return but also increases the volatility of the fund and increases the risk of a total loss of the amount invested;
- (iii) funds may have differing investment restrictions and some funds may invest in assets which are illiquid or difficult to transfer. This may have an effect on the realisation of such assets and in turn, the value and performance of the fund. In addition, a fund's assets or investments may be concentrated in a few markets, countries, industries, commodities, sectors of an economy or issuers. If so, adverse movements in a particular market, country, industry, commodity, economy or industry or in the value of the securities of a particular issuer could have a severely negative effect on the value of such fund. In addition, a fund may use a single advisor or employ a single strategy, which could mean a lack of diversification and higher risk;
- (iv) substantial redemptions by holders of interests in a fund within a short period of time could require the fund's investment manager(s) and/or advisor(s) to liquidate positions more rapidly than would otherwise be desirable, which could adversely affect the value of the fund's assets; and
- (v) the performance of a fund will be heavily dependent on the performance of investments selected by its advisors or investment managers and the skill and expertise of such fund service providers in making successful and profitable investment decisions. Such skill and expertise may be concentrated in a number of the advisor's or investment manager's key

personnel. Should these key personnel leave or become no longer associated with the fund's advisor or investment manager, the value or profitability of the fund's investments may be adversely affected as a result. The past performance of a fund advisor or investment manager, or any investment strategy adopted by such entity in respect of any other fund, may not be reflective of the present or future performance or strategy of a fund.

- d. **Determinations made by the Index Sponsor in respect of Potential Adjustment Events and Fund Events may have an adverse effect on the value of a Financial Product** – Upon the determination by the Index Sponsor that a Potential Adjustment Event has occurred, the Index Sponsor shall determine whether such Potential Adjustment Event has a diluting or concentrative effect on the theoretical value of the relevant Fund Interest and, if so, whether the procedures under Section 10.1 (*Adjustment Events*) of the Description will apply, or if a Fund Event has occurred the procedures under Section 10.1 (*Adjustment Events*) of the Description will apply which may, in each case, adversely affect the Index Level and, therefore, the value of a Financial Product.

Potential Adjustment Events include, amongst other things (a) a sub-division, consolidation or re-classification of Fund Interests, (b) an extraordinary dividend, (c) a repurchase by the relevant Fund of the relevant Fund Interests or (d) any event having a dilutive or concentrative effect on the value of the relevant Fund Interest. Fund Events include, amongst other things, (1) a nationalisation of the relevant Fund Interest, (2) the occurrence of one or fund insolvency events, (3) a breach of strategy by the relevant Fund and (4) a force majeure event in respect of the relevant Fund Interests.

- e. **Effective Exposure** – The Effective Exposure is determined by a rules-based algorithm. The correlation between the Index and the Index Component may vary over time and may increase or decrease by reference to a variety of factors, which may include macro-economic factors and speculation.
- f. **Reform of interest rate and other “benchmarks”** – The use and application of benchmarks such as LIBOR, EURIBOR and STIBOR in transactions and other documents have been the subject of recent national, international and other regulatory guidance and proposals for reform. Some of these reforms are already effective while others are still to be implemented. These reforms may cause such “benchmarks” to perform differently than in the past, or to disappear entirely, or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on the Index or any of its constituents. Any of the international, national or other proposals for reform or the general increased regulatory scrutiny of “benchmarks” could increase the costs and risks of administering or otherwise participating in the setting of a “benchmark” and complying with any such regulations or requirements. Such factors may have the effect of discouraging market participants from continuing to administer or participate in certain “benchmarks,” trigger changes in the rules or methodologies used in certain “benchmarks” or lead to the disappearance of certain “benchmarks.” The disappearance of a “benchmark” or changes in the manner of administration of a “benchmark” could have materially adverse consequences in relation to the Index or any of its constituents. In particular, but without limitation, any change, cessation, increase in costs or other event relating to a “benchmark” may result in the occurrence of a Disruption Event in relation to the Index, pursuant to which the Index Sponsor may take action in accordance with the Description.
- g. **Potential replacement or reform of LIBOR, EURIBOR, STIBOR, EONIA or other interest rate benchmarks may adversely affect the level of the Index** – In response to concerns about the susceptibility of LIBOR and other interest rate benchmarks, including EURIBOR, STIBOR and EONIA (collectively, the “**IBORS**”) to manipulation, central banks around the world have commissioned working groups that include market participants (the “**Alternative Rate Committees**”) with the goal of finding suitable replacements for their currency’s LIBOR that meet IOSCO’s international standards for benchmarks (“**risk free rates**” or “**RFRs**”).
- h. In July 2017, the Chief Executive of the United Kingdom Financial Conduct Authority (the “**FCA**”), which regulates LIBOR, called for an orderly transition over a 4 to 5 year period from LIBOR to the RFRs selected by the Alternative Rate Committees. The Financial Conduct Authority’s announcement also stated that it expects that it would not be in a position to sustain LIBOR through its influence or legal compulsion powers after the end of 2021. In addition, the European Money Markets Institute (“**EMMI**”), the publisher of EURIBOR and EONIA, has announced that EONIA (in its current form) is not a viable rate going forward due to decreased transactional activity and, as a result, EONIA is expected to be materially modified by the end of

2019 and then replaced in the next 2 years. EMMI is also undertaking efforts to reform EURIBOR so that it more accurately reflects transactions in the euro money market.

Any transition away from the IBORs to the RFRs, including a failure to find a suitable replacement rate, as well as the uncertainty surrounding the future of the IBORs and future regulatory and market developments, could have a materially adverse effect on the return on the Index. There are a number of potential risks related to the RFRs which include, but are not limited to, the following:

- they will have a very limited history and future performance cannot be predicted based on historical performance;
- they may exhibit greater volatility than the IBORs;
- they may fail to gain widespread market acceptance;
- the composition and characteristics of the RFRs are not the same as those of the IBORs and there is no guarantee that they will be comparable substitutes or that any substitutes will produce the economic equivalent of the IBORs; and
- the respective administrators of the RFRs may make changes that could change the value of the RFRs or discontinue such rates and it has no obligation to consider your interests in doing so.

Any or all of these potential risks could have a materially adverse effect on the level of the Index.

- i. **Different methods for calculating volatility may give different results** – There are different methods for calculating volatility, and using a different method from the method used for the purposes of the Index may give a different result. The volatility targeting methodology of the Index measures volatility with reference to a specified number of days. Measuring volatility over a different number of days may give a different result.
- j. **Volatility targeting may be unsuccessful** - The volatility targeting methodology of the Index may not succeed in maintaining the annualised volatility of the level of the Index at the volatility target specified in respect of it. The actual annualised volatility of the level of the Index may be higher than or lower than the volatility target that is specified in respect of it. The volatility targeting methodology of the Index will not prevent a decrease in the level of the Index.
- k. **Volatility targeting may result in reduced performance** – The volatility targeting methodology of the Index may result in the exposure of the Index to the Index Component being considerably less than 100%. This means that the gains of any Financial Product may be significantly less than the gains of any investment product linked to the Index Component.
- l. **The Index is adjusted by deductions included in the Index Level** - Notional embedded costs, in the form of a Funding Rate and a Running Rate are included within the Index and will reduce the Index Level. Any such amounts will be deducted from the performance of the Index with the intention of reflecting synthetically the costs of implementing a strategy that mirrors the Index.
- m. **The Index performance is subject to fluctuations** – The Index is a notional, rules-based index comprising the Index Components and the Index Level may decline. The Index methodology described in the Description was developed based on historical data and conditions and there are no assurances that the methodology will generate positive performance in the future. The performance of the Index is dependent on many factors, including developments and trends in the markets for the Index Components. The Index performance can go up as well as down, and can register significant losses, including in some cases that the Index falls to zero. Any past performance of the Index (actual or simulated) is not an indication of its future performance.
- n. **Risks and rewards of a Financial Product** – Financial Product Investors should ensure that they review the economic terms of the relevant Financial Product and not only the terms of the Index in order to understand the risks and rewards of an investment in such Financial Product.
- o. **The Index is not an investment in the Index Components** – The Index is calculated as a “notional” index. This means that the Index is calculated by reference to the Index Component Value in respect of each Index Component, however the strategy embedded in the Index means that any return might be higher or lower than the aggregate performance of the Index Components. However, there is no requirement for the Index Sponsor to obtain an exposure in relation to any Index Component in order to calculate the Index.

- p. **A Financial Product Investor will have no rights in respect of the Index Components or any Index Components** – The investment exposure provided by the Index is synthetic. An investment referenced to an Index therefore not make a Financial Product Investor a holder of, or give a Financial Product Investor a direct investment position in, an Index or any Index Component (or any components thereof).
- q. **An investment in the Index may be subject to dilution, which may limit the gains in such investment** – The Index may be subject to dilution, such that Financial Product Investors may not benefit fully from increases or decreases (depending on whether the exposure is long or short) in the value of an Index Component. Dilution means that the return or loss on an investment is subject to a multiplier decreasing exposure to such investment and reducing the volatility and risk of loss should the value of such investment decline, but reducing the potential gain should the value of such investment increase. Financial Product Investors should be aware that if the value of an Index Component increases or decreases, an investment linked to the Index may not have the same magnitude of increased or decreased value as such Index Component.
- r. **No liability** – Notwithstanding any other provision within the Description, and subject as provided by any applicable law or regulation, in no event shall the Index Sponsor or the Index Calculation Agent, acting in each case in such capacity, be liable (whether directly or indirectly, in contract, tort or otherwise) for any loss incurred by any person that arises out of or in connection with the Index, including in relation to the performance of the Index Sponsor or the Index Calculation Agent, as applicable, of any part of its respective role under the Description, provided that nothing shall relieve each of the Index Sponsor and the Index Calculation Agent from any liability arising by reason of fraud or acts or omissions constituting any breach of regulation or other applicable law.
- s. **The Index Sponsor may make adjustments to the Description in certain circumstances** – The Index Sponsor may make adjustments to this Description without consulting with Financial Product Investors in circumstances where the Index Sponsor has determined that such change is not material to Financial Product Investors, including if it is of a formal, minor or technical nature. Before making any other adjustment to the Description, the Index Sponsor will give prior notice to Financial Product Investors. Such adjustments could include, but are not limited to: (i) adjusting any relevant Index Component Value, (ii) replacing or removing an Index Component, (iii) postponing the publication of an Index Level or (iv) suspending or cancelling the Index. Any adjustments made to the Index may impact its future performance and result in an adverse return to a Financial Product Investor.
- t. **Discretion** – The Description confers on each of the Index Sponsor and the Index Calculation Agent the right to make determinations, calculations, adjustments and modifications in relation to the Index and related matters, which involve, in certain circumstances, a degree of discretion in order to ensure that the Index can, where reasonably practicable, continue to be calculated and determined notwithstanding the relevant circumstances or, to allow a delay or a cancellation of the Index (including, without limitation, upon the occurrence of certain Adjustment Events or certain dilutive or concentrative events or other market disruption events in relation to Index Components as specified in the Description). Such adjustments may include, without limitation, adjusting the composition of the Index which exposes Financial Product Investors to the risk that any replacement Index Component may perform differently from the original Index Component, which may have an adverse effect on the performance of the Index.

Each of the Index Sponsor and the Index Calculation Agent will, as far as reasonably practicable, exercise any such discretion with the aim of ensuring that the Index continues to reflect, as closely as possible, the underlying economic interest it is designed to represent. The exercise of these discretions may have a significant effect on the Index and a Financial Product. Financial Product Investors should note that they are exposed to the exercise by the Index Sponsor of such discretions and in exercising such discretions, the Index Sponsor and the Index Calculation Agent have no obligations to consider the interests of any other person including (but not limited to) Financial Product Investors. Each of the Index Sponsor and the Index Calculation Agent, unless otherwise specified, is required to act using reasonable discretion, however, there can be no assurance that the exercise of any such discretion (or the absence of exercise, as the case may be) will not increase or decrease the Index Level and/or alter the volatility of the Index.

- u. **Political and economic factors** – Index Component Values may be influenced by a number of circumstances, including, but not limited to, political events, general economic conditions,

government intervention, changes in balances of payments and trade, domestic and international rates of inflation, international trade restrictions and currency devaluations. Any such circumstance (or a combination of them) may cause unexpected volatility or illiquidity in the relevant markets. The Index may fail to take account of such events and, as a result, investment losses may occur which may in turn have an adverse effect on the performance of a Financial Product.

With respect to any emerging or developing nation, there is the possibility of nationalisation, expropriation or confiscation, political changes, government regulation, social instability or other developments (including war) which could affect adversely the economies of such nations or Index Component Values that are linked or have an exposure to such nations.

- v. **Market volatility** – The underlying markets for Index Components (including, without limitation and, if applicable, in commodities, metals, financial instruments, interest rates and indices) may be volatile and subject to sudden fluctuations of varying magnitude, any may be influenced by, amongst other things, government trade, fiscal, monetary and exchange control programmes and policies, national and international political and economic events and changes in interest rates. The volatility of such underlying markets may render it difficult or impossible to predict or anticipate fluctuations in the value of Index Components which could result in losses and an adverse effect on the Index.
- w. **Rules-based Index** – The Index is quantitative and rules-based and is not managed actively by the Morgan Stanley Group or any third party. Consequently, the Morgan Stanley Group does not have discretion to change the Description if there are significant changes in the performance of the Index Components that cause the Index to decline significantly or underperform.
- x. **Information about the Index is no guarantee of the performance of the Index** – Certain presentations and historical analysis or other statistical analysis materials in respect of the operation and/or potential returns of the Index which may be provided are based on a number of assumptions, historical estimates, simulated analyses and hypothetical circumstances to estimate how the Index may have performed prior to its actual existence. The Index Sponsor may use historical data that is available to calculate the hypothetical level of the Index prior to its inception. If the Index Sponsor determines that such historical data is not available or is incomplete, the Index Sponsor may use alternate sources of data in place of such historical data as well as make certain modifications to the index methodology as it deems necessary to calculate the hypothetical level of the Index prior to its inception. The Index Sponsor provides no assurance or guarantee that the Index will operate or would have operated in the past in a manner consistent with those materials.
- y. **Index Base Date** – The Index will only have been calculated since the Index Base Date, being a date determined by the Index Sponsor as the date on which the Index Level would have been equal to the Initial Index Level based on back-testing (using simulated analyses and hypothetical circumstances, as further described in the Description). As such, any historical returns or any hypothetical simulations based on such back-tested data or analyses with respect to the period from the Index Base Date to the date on which Financial Products are first implemented (which may be materially later than the Index Base Date), may not reflect the performance of, and are no guarantee or assurance in respect of the performance or returns of, the Index over any time period.
- z. **Limited operating history and unanticipated performance** – The Index is a relatively new strategy. Where limited historical performance data exists with respect to the Index Components and the Index itself, any investment in respect of which returns are linked to the performance of the Index or the Index Components may involve a greater risk than an investment linked to returns generated by an investment strategy with a proven track record. While a longer history of actual performance could provide more reliable information on which to assess the validity of the Index and on which to base an investment decision, the fact that the Index and the Index Components are relatively new would not allow this. There can be no guarantee or assurance that the Index or the Index Components will operate in a manner consistent with the data available.
- aa. **Reliance on information** – Calculations related to the Index may rely on information obtained from various publicly available sources. The Morgan Stanley Group and the Index Calculation Agent have relied on and will rely on these sources. In addition, the Morgan Stanley Group and the Index Calculation Agent have not verified independently and will not verify independently the information extracted from these sources. Accordingly, Financial Product Investors are subject to the risk that such third party information is inaccurate or incomplete and, in such circumstances,

any such inaccuracy or incompleteness will be reflected in the calculation of the Index and may have a material impact on the performance of the Index.

- bb. **No disclosure of information** – The Morgan Stanley Group may be in possession at any time of information in relation to Index Components which may not be available to Financial Product Investors. There is no obligation on any member of the Morgan Stanley Group to disclose to Financial Product Investors any such information.
- cc. **Conflict of interests** – The Morgan Stanley Group (including the Index Calculation Agent and the Index Sponsor) may from time to time engage in transactions involving the Index Components for their own account and/or for the account of their clients and may act as market-maker for such Index Components. Such activities may not be for the benefit of Financial Product Investors and may have an effect on the value of the Index and, consequently, on the value and performance of any Financial Products. In addition, the Morgan Stanley Group may from time to time act in other capacities such as the issuer of investments or the advisor thereof. Morgan Stanley Group entities also may issue, hold or enter into financial instruments and/or enter into derivative contracts in respect of the Index Components and the use of such instruments and/or derivatives may affect the value of the Index Components. Morgan Stanley Group entities may, but are not obliged to, enter into hedging transactions in respect of the Index Components in order to meet obligations in respect of Financial Products or for any other purpose which may affect the value of such components or of any Financial Products. If they do, Morgan Stanley Group entities will have certain rights pursuant to such hedging transactions and/or in relation to any transactions that have given them exposure to Index Components and will pursue actions and take steps as they deem appropriate to protect their own interests.

In addition, the unwinding of such hedging transactions may affect the value of such Index Components or instruments which may affect the value of the Index. Morgan Stanley Group entities may make gains and/or losses from such hedging activity. In acting in any of these capacities, subject as provided by any applicable law or regulation, no member of the Morgan Stanley Group is obliged to take into account the interests of any person including (but not limited to) Financial Product Investors.
- dd. **Litigation and disputes** – The Index Sponsor, the Index Calculation Agent or any member of the Morgan Stanley Group may be subject to litigation or arbitration proceedings or disputes with other entities. Any such event may adversely affect the ability of the Index Sponsor or the Index Calculation Agent to perform their duties in respect of the Index and, therefore, may adversely affect the Index and, consequently, any Financial Product.
- ee. **Morgan Stanley research** – The Morgan Stanley Group may issue research reports on securities or other financial instruments that are, or may become, Index Components. These reports are independent of the obligations of the Index Sponsor and the Index Calculation Agent described in the Description.
- ff. **The Index Sponsor's determinations are final and conclusive** – The Index Calculation Agent is responsible for compiling and calculating the Index pursuant to the Description and has certain discretions relating to the Index. The Index Sponsor retains the discretion to appoint an alternative Index Calculation Agent. The Index Sponsor retains the final discretion as to the manner in which the Index is calculated and constructed. Furthermore, the Index Sponsor has the final authority on the Index and the interpretation and application of the Description. The Index Sponsor makes no representation (implied or otherwise) as to the performance of any Index Component and/or the Index.
- gg. **Tax Considerations** – In July 2015, the U.S. Treasury Department and the Internal Revenue Service (“IRS”) released a notice designating certain “basket contracts” and substantially similar transactions as “transactions of interest,” subject to information reporting requirements as “reportable transactions” under Section 6011 of the U.S. Internal Revenue Code of 1986, as amended. The scope of this notice is unclear, and it is therefore possible that the Financial Products could be subject to the notice. In that case, Financial Product Investors would be required to report certain information to the IRS, as set forth in the applicable Treasury regulations regarding “reportable transactions”. If the IRS determines such a transaction is a “transaction of interest” and Financial Product Investors fail to disclose the transaction, such holders could be subject to penalties. Financial Product Investors should consult their tax advisers regarding the potential application of this notice to Financial Products.

10. **Risk Factors relating to certain features of the Securities**

- 10.1 Underlying Performance: The Final Redemption Amount includes a component which is calculated as the product of (x) the Participation Rate and (y) the higher of zero per cent. and the Underlying Performance. Investors in the Securities will only receive this component if the Underlying Performance is a positive number. The Underlying Performance involves a comparison of (i) the Initial Reference Value (being the Relevant Underlying Value observed on the Strike Date) and (ii) the Final Average Value (being the arithmetic mean of the value of the Relevant Underlying as on each Averaging Date, as determined on the Determination Date).
- 10.2 Averaging: The Final Average Value is determined based on the arithmetic mean of the values of the Relevant Underlying on each Averaging Date. This will limit the extent to which a sudden increase in value or performance of the Relevant Underlying on a single date affects the Final Average Value (and therefore the Underlying Performance).

1. Introduction

This Description sets out the methodology of the MS Nordic Equity Fund 13% Index (the “**Index**”) and the basis on which the Index is calculated.

This Description is intended to provide the information relating to the Index required by the Regulation on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) 596/2014 ((EU) 2016/1011)) (as amended) (the “**EU Benchmarks Regulation**”) as it forms part of “retained EU law” in the United Kingdom as defined in the European Union (Withdrawal) Act 2018 (as amended from time to time) (the “**UK Benchmarks Regulation**” and, together with the EU Benchmarks Regulation, the “**Benchmarks Regulation**”). This Index is a non-significant and regulated data benchmark for the purposes of the UK Benchmarks Regulation.

As at the date of publication of this Description, Morgan Stanley & Co. International plc appears on the register of benchmark administrators established and maintained by the Financial Conduct Authority pursuant to Article 36 of the Benchmarks Regulation. Morgan Stanley & Co. International plc’s benchmark statement (the “**MS Benchmark Statement**”) can be accessed via the following link:

Subject as provided in Section 10 (*Adjustment and Disruption Provisions*), this Description is subject to change or adjustment at any time and will be superseded by any subsequent Description. A copy of the current version of the Description can be obtained following the method described in Section 8 (*Publication*).

No one may reproduce, distribute or disseminate this Description, any information contained in this Description or any Index Level (as applicable) without the prior written consent of the Index Sponsor. This Description is not intended for distribution to, or use by any person in, a jurisdiction where such distribution is prohibited by law or regulation.

2. **Risk Factors and Investment Considerations**

Prior to making an investment decision in respect of any Financial Product, prospective investors should consider carefully all of the information set out in this Description and the risk factors set out in item 9.5 (*Risks pertaining to the MS Nordic Equity Fund 13% Index*) of the section of this Prospectus entitled “*Risk Factors*”. Such item 9.5 (*Risks pertaining to the MS Nordic Equity Fund 13% Index*) of the section of this Prospectus entitled “*Risk Factors*” is intended to describe various risk factors which the Index Sponsor believes represent the principal risks associated with any securities issues, derivative transactions or other financial product the return of which is linked to, or otherwise determined by reference to, the Index (each such issue, transaction or product, a “**Financial Product**”). Each investor in relation to a Financial Product is referred to as a “**Financial Product Investor**”. Such risk factors should be considered in conjunction with the other risk factors set out in the section of this Prospectus entitled “*Risk Factors*”. There may be other risks and considerations not set out below that prospective investors should consider that are relevant either to their particular circumstances or more generally, whether arising from market factors or otherwise. In particular, other risks may exist in relation to the Financial Product itself. Each prospective investor should make their own investigations and form their own views as to the appropriateness or otherwise of the Index taking into account their own circumstances.

3. Overview

This section provides an overview of a number of features of the Index. There are aspects of the Index to which this section does not refer. Prospective investors should read the entire Description, including (without limitation) Section 2 (Risk Factors and Investment Considerations), before making any investment decision. Capitalised terms not otherwise defined shall have the meaning given to them elsewhere in this Description.

Summary

The Index aims to provide exposure to the Index Component and to maintain the volatility of the Index at a specified level through the use of the volatility target mechanism which adjusts the Effective Exposure if the predicted volatility of the Index exceeds the volatility target by a pre-specified trigger threshold.

An Index Level is calculated in relation to each Index Business Day by the Index Calculation Agent. This will be used in connection with one or more Financial Products issued or entered into by a member of the Morgan Stanley Group. Generally, only a Financial Product issued or entered into by a member of the Morgan Stanley Group is permitted to use or reference the Index (directly or indirectly) but other Financial Products issued or entered into by financial services providers other than members of the Morgan Stanley Group may be permitted to use or reference the Index with the consent of a member of the Morgan Stanley Group. A Financial Product Investor has no ownership or other rights to or in respect of Index Components in its capacity as a Financial Product Investor or any other assets which are from time to time comprised in the Index.

The Index references a “notional” or synthetic exposure to the Index Component and there is no actual portfolio of assets to which any person is entitled or in which any person has any ownership. The Index merely identifies the Index Component and a rules-based strategy, the performance of which is used as a reference point for calculating Index Levels.

This Section 3 (*Overview*) is subject to, and qualified by, the remainder of this Description.

4. Index Sponsor

The Index has been developed by Morgan Stanley & Co. International plc (“**MSI plc**”). The Index is administered by the index sponsor or any successor thereto (the “**Index Sponsor**”). The initial Index Sponsor is MSI plc.

The Index Sponsor controls the creation and operation of the Index administrative process, including all stages involved in the production and dissemination of the Index. The Index Sponsor also is responsible for the manner in which the Index is calculated and constructed, and is the final authority on the Index and the interpretation and application of this Description. Notwithstanding that the Index relies on information from third party sources, the Index Sponsor has primary responsibility for all aspects of the Index administration and determination process.

Although the Index Sponsor will obtain information for inclusion in or for use in the calculation of the Index from sources which the Index Sponsor considers reliable, the Index Sponsor will not independently verify such information and does not guarantee the accuracy and/or the completeness of the Index or any data included therein.

The Index Sponsor is not acting as a manager or an investment advisor in relation to the Index and has no relationship of agency or trust or any fiduciary duty to any person in respect of the Index and is not required to take the interests of any person into account in making any determination or calculation in relation to the Index.

The Index Sponsor makes no warranty or representation (implied or otherwise) as to the performance of any Index Component and/or the Index.

No Financial Product is sponsored, endorsed, sold or promoted by MSI plc or the Index Sponsor, and neither MSI plc nor the Index Sponsor makes any express or implied representations or warranties as to (a) the advisability of purchasing or assuming any risk in connection with any Financial Product, (b) the levels at which the Index stands at any particular time on any particular date, (c) the results to be obtained by the issuer or obligor of any Financial Product, or any Financial Product Investor, or any other person or entity from the use of the Index or any data included therein in connection with any licensed rights or for any other use or (d) any other matter. Neither MSI plc nor the Index Sponsor make any express or implied representations or warranties of merchantability or fitness for a particular purpose with respect to the Index or any data included therein.

Subject as provided by any applicable law or regulation, and without limiting any of the foregoing, in no event shall MSI plc/ or the Index Sponsor have any liability (whether in negligence or otherwise) to any person for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Subject as provided by any applicable law or regulation, neither MSI plc nor the Index Sponsor accepts any legal liability to any person for publishing or not continuing to publish for any period of time any Index Level at any particular place or any particular time.

MSI plc may in its sole and absolute discretion delegate and/or transfer any of its obligations and/or functions in relation to the administration and determination of the Index to one or more third parties as it deems appropriate from time to time. MSI plc in exercising such right is not required to take into account the interests of any Financial Product Investors or transactions linked in whole or in part to the Index.

5. Index Calculation Agent

The Index is calculated by MSI plc (or any successor thereto) (the “**Index Calculation Agent**”).

The Index Calculation Agent is responsible for compiling and calculating the Index pursuant to this Description. The Index Sponsor retains the discretion to terminate the appointment of the Index Calculation Agent and to appoint an alternative Index Calculation Agent.

Subject as provided by applicable law and regulation, the Index Calculation Agent expressly disclaims all liability for any inaccuracy in calculations and the publication of the Index, the information used for making adjustments to the Index and the actual adjustments, as well as for the quality, accuracy, timeliness or completeness of the information contained in the Index or this Description or for delays, omissions, interruptions in the delivery of the Index or information related to it. No liability to any person shall attach to the Index Calculation Agent in connection with the exercise or non-exercise by it of any powers, duties or discretions.

The Index Calculation Agent makes no representation (implied or otherwise) as to the performance of any Index Component and/or the Index.

The Index Calculation Agent’s calculations and determinations in relation to the Index shall be binding on all persons in the absence of manifest error. The term “manifest error” as used herein shall mean an error that is plain and obvious and can be identified from the results of the calculation or determination itself without (i) recourse to the underlying data or (ii) any application or re-application of any formulae. No person (whether a Financial Product Investor or otherwise) will be entitled to proceed (and shall be deemed to have agreed to waive proceedings) against the Index Calculation Agent in connection with any such calculations or determinations or any failure to make any calculations or determinations in relation to the Index.

For so long as the Index Calculation Agent constitutes and calculates the Index, the Index Calculation Agent does not accept any liability for loss or damage of any kind (including, without limitation, any special, punitive, indirect or consequential damages (including loss of profits)) arising from the use of such information in any such calculation or determination. The Index Calculation Agent makes no representation (implied or otherwise) as to the performance of any Index Component and/or the Index itself and disclaims all warranties of merchantability or fitness for a particular purpose or use with respect to the Index or any information in connection with it.

6. Index Data

The Index is calculated on the basis of publicly available third party data. In particular, the Index will utilise the Index Component Value and the Funding Rate in respect of each Index Component as published on the relevant Index Component Price Source in respect of such Index Component.

No assurance can be given that any such Index Component Values or Funding Rate will be published on the relevant Index Component Price Source or on the Funding Rate Screen Page accurately, in a timely manner or at all and the Index Sponsor and the Index Calculation Agent have relied on, and will rely on, such Index Component Values and Funding Rate as they are published on the relevant Index Component Price Source or Funding Rate Screen Page. Neither the Index Sponsor nor the Index Calculation Agent has independently verified the information extracted from such sources and accepts no responsibility or liability in respect thereof.

7. Calculation of the Index

7.1 Index Level

The Index Level in respect of the Index Base Date shall be equal to the Initial Index Level.

The Index Level in respect of each Index Business Day (each an “**Index Business Day t**”) from (but excluding) the Index Base Date shall be an amount, expressed in the Index Currency, calculated by the Index Calculation Agent in accordance with the following formula:

$$\text{Index Level}(t) = \text{Max} \left(0, \text{Index}(t-1) \times \left[1 + \text{Exposure}(t-1) \times \left(\frac{\text{Basket}(t)}{\text{Basket}(t-1)} - 1 - \text{Rate}(t-1) \times \frac{\Delta t}{\text{DayCount}} \right) \right] - \text{RunningCost}(t) \right)$$

Where:

max, followed by amounts (or values) inside brackets, means whichever is the greater of the amounts (or values) separate by a semi-colon inside such brackets;

Index Level(t-1) means the Index Level in respect of the Index Business Day immediately preceding Index Business Day t;

Exposure(t-1) means the Exposure in respect of Index Business Day t-1;

Basket(t) means the Basket Mechanism in respect of Index Business Day t;

Basket(t-1) means the Basket Mechanism in respect of the Index Business Day immediately preceding Index Business Day t;

Rate(t-1) means the Funding Rate in respect of the Index Business Day immediately preceding Index Business Day t;

Δt means the number of calendar days from (and including) the Index Business Day immediately preceding Index Business Day t to (but excluding) Index Business Day t;

DayCount means 360; and

RunningCost(t) means, in respect of Index Business Day t, an amount calculated by the Index Calculation Agent in accordance with the following formula:

$$\text{RunningCost}(t) = \text{Index Level}(t-1) \times \left[\frac{\Delta t}{\text{DayCount}} \times \text{Running Rate} \right]; \text{ and}$$

Running Rate means 2.00 per cent.

7.1.1 Calculation of the Exposure

The exposure (the “**Exposure**”) in respect of an Index Business Day shall be an amount calculated by the Index Calculation Agent in accordance with the formula set out below:

$$\text{TheoreticalExposure}(t) = \text{Min} \left[\text{maxExposure}, \frac{\text{Vol Target}}{\text{Realised Volatility}(t - \text{Lag})} \right]$$

$$\text{IF } |\text{TheoreticalExposure}(t) - \text{Exposure}(t)| > \text{Threshold THEN} \\ \text{Exposure}(t) = \text{Theoretical Exposure}(t) \text{ ELSE}$$

$$Exposure(t) = Exposure(t - 1)$$

Where:

maxExposure means 150 per cent.;

VolTarget means 13 per cent.;

Threshold means 5 per cent.;

Lag means 2; and

Realised Volatility (t-Lag) means the Realised Volatility in respect of Index Business Day (t-Lag).

7.1.2 Calculation of the Realised Volatility

The Realised Volatility in respect of an Index Business Day shall be an amount calculated by the Index Calculation Agent in accordance with the formula set out below:

$$Realised\ Volatility(t) = \sqrt{\frac{252}{20} \times \sum_{k=t-19}^t \ln\left(\frac{Basket(k)}{Basket(k-1)}\right)^2}$$

7.1.3 Calculation of the Basket Mechanism

The basket mechanism (the “**Basket Mechanism**”) in respect of an Index Business Day shall be an amount calculated by the Index Calculation Agent in accordance with the following formula:

$$Basket(t) = Spot(t)$$

Where:

Spot(t) means, in respect of an Index Business Day, the Index Component Value in respect of the Index Component in respect of such Index Business Day.

7.2 Miscellaneous

Each Index Level shall be published by the Index Calculation Agent (rounded to two decimal places, with 0.005 being rounded upwards), as set out in Section 8 (*Publication*).

For the avoidance of doubt, the Index Level is tracked without rounding by the Index Calculation Agent, and all calculations in this Section 7 (*Calculation of Index*) are based on the unrounded Index Level, while the rounded level is disseminated for publication.

The methodology described in this Section 7 (*Calculation of the Index*) is subject to the provisions set out in Section 10 (*Adjustment and Disruption Provisions*).

7.3 Index Live Date and Retrospective Calculations

The Index has been calculated by the Index Calculation Agent since the Index Live Date on a live basis.

Index performance in respect of the period from (and including) the Index Base Date to (but excluding) the Index Live Date (the “**Back-test Period**”) has been simulated and is not actual performance. Accordingly the Index has been calculated retrospectively by the Index Calculation Agent on a hypothetical basis with the Index having an Index Level equal to the Initial Index Level on the Index Base Date.

The Index was launched by the Index Sponsor on the Index Live Date. The Index has been calculated by the Index Calculation Agent for the period from (and including) the Index Base Date. All prospective investors should be aware that any retrospective calculation of the Index means that no actual investment existed at any time during the period of the retrospective calculation and as such, the performance of the Index is purely hypothetical. Past performance (actual or simulated) is not a guide to future performance.

The methodology and the strategy used for the calculation and retrospective calculation of the Index have been developed with the advantage of hindsight. In reality, it is not possible to invest with the advantage of hindsight and therefore past performance is purely theoretical.

The market conditions which existed during the Back-test Period are not necessarily representative of the market conditions which may exist in the future. In addition, the market conditions in the Back-test Period do not reflect the effect on the relevant markets of the launch of the Index and of the delivery of exposures to the Index through Financial Products, which may include any hedging by the provider or issuer of such Financial Products. Where the Index has been developed to identify and to monetise a particular opportunity in the relevant markets, it should be noted that corresponding investments made by market participants, including any hedging by the providers of Financial Products, may erode such an opportunity, and therefore the hypothetical Index performance in respect of the Back-test Period may overstate the actual performance of any Financial Product.

8. **Publication**

Subject to Section 10 (*Adjustment and Disruption Provisions*) below, the Index Calculation Agent will make available (i) the Index Level in respect of each Index Business Day as soon as reasonably practicable after 8 am London time (the “**Index Publication Time**”) on the second Index Business Day immediately following such Index Business Day or where, in the sole discretion of the Index Calculation Agent, publication on such Index Business Day is not possible or practicable, the immediately following Index Business Day on the Bloomberg Page or such other source as the Index Sponsor may select from time to time at its reasonable discretion and (ii) details of any adjustments made to the Index as described in Section 10 (*Adjustment and Disruption Provisions*) to Financial Product Investors.

Subject as provided by applicable law or regulation, the Index Sponsor accepts no liability to any person for any publication, suspension of publication or non-publication of the Index Level for any period or in any place.

Any publication described in this Section 8 (*Publication*) may be restricted, except as otherwise provided by law, by means determined as appropriate for such purpose by the Index Sponsor in its reasonable discretion including, without limitation, restricting access to a limited set of persons in accordance with arrangements agreed between MSI plc and such persons.

10. Adjustment Provisions

10.1 Adjustment Events

Subject as provided in Section 10.2 (*Adjustment procedures, notification and consultation process*), if the Index Sponsor determines in its reasonable discretion that an Adjustment Event has occurred or may occur, the Index Sponsor may acting in good faith and a commercially reasonable manner:

- (i) substitute any Index Component or the Funding Rate (as applicable) which is affected by such Adjustment Event with a replacement component or rate (as applicable), provided that such replacement has substantially similar characteristics to the affected component or rate (as applicable), having regard to the manner in which the affected component or rate (as applicable) is used in the calculation of the Index (as determined by the Index Sponsor in its sole and absolute discretion) and, if so, will (I) determine the effective date of such substitution and (II) make such adjustment(s) to the terms of the Index as it deems appropriate to account for the effect on the Index of such substitution; and/or
- (ii) provide data from alternative but comparable sources to the Index Calculation Agent, in each case for such period as it determines appropriate;
- (iii) determine that the Index Component Value in respect of any Index Component which is affected by such Adjustment Event in respect of each Index Business Day following the Index Business Day on which such Adjustment Event occurred (the “**Relevant Day**”) shall be equal to the Index Component Value in respect of such Relevant Day;
- (iv) make such determinations and/or adjustments to the terms of the Index as it considers appropriate to determine any part of the Index (including, without limitation, the value of any Index Component) or calculate the Index Level in respect of an Index Business Day; and/or
- (v) delay calculating and making available the Index Level until the next Index Business Day on which it determines that no Adjustment Event exists; and/or
- (vi) cancel the Index and permanently cease to calculate the Index Level.

10.2 Adjustment procedures, notification and consultation process

The Index is calculated on the basis of algorithmic formulas and therefore no discretion can be exercised by the Index Sponsor or the Index Calculation Agent in the calculation of the Index. The Index Sponsor will, subject as provided below, employ the methodology set out in this Description to calculate the Index.

However, on occasion, there may be situations, outside the pre-defined adjustments and rebalances, which may make an adjustment of the methodology appropriate or necessary to ensure that the Index continues to achieve its objectives. These situations may include fiscal, market, regulatory, juridical, financial or, without limitation, any other circumstances that was not anticipated to occur when the Index was launched.

The Index Sponsor may decide that these situations necessitate or make desirable a modification or change to this Description. Any such decision will however be taken in a commercially reasonable manner and exclusively in order to ensure that the Index continues to reflect, as closely as possible, the underlying economic interest it was designed to represent in the sole determination of the Index Sponsor and the Index Calculation Agent.

The Index Sponsor may make any amendment to this Description (a “**Change**”) which in its determination is not material to Financial Product Investors, including if it is of a formal, minor or technical nature or to correct a manifest error. In this case the Index Sponsor is not required to consult with Financial Product Investors. Details of the Change will be made available by the Index Sponsor in accordance with Section 8 (*Publication*). For the purposes of determining the materiality of a Change, the Index Sponsor shall consider a change to be material if it may have a potentially material effect on any future level of the Index.

In relation to any Change to this Description other than as described in the immediately preceding paragraph (a “**Material Change**”) the Index Sponsor will give prior notice to Financial Product Investors that a

Material Change is proposed. Details of the Material Change will then be available upon request to the Index Sponsor to allow Financial Product Investors to give any comments on the proposed Material Change.

The Index Sponsor is required to give at least ten Index Business Days' notice of a Material Change before making this, provided that it may reduce this notice period to not less than one Index Business Day in the case of a Material Change which is required to ensure that the Index may be fully hedged on an effective basis by or on behalf of any member of the Morgan Stanley Group. Modifications or adjustments which the Index Sponsor may make include, without limitation, amendments to the methodology, and substitution or removal of underlying Index Components from the Index, which, in each case, may have a negative impact on the performance of the Index.

Any comments from Financial Product Investors and the Index Sponsor's responses to these will be made accessible to Financial Product Investors upon request to the Index Sponsor, except where the comment provider has requested confidentiality. However any such comments and responses may not be available prior to the Material Change being made.

Subject as provided in the MS Benchmark Statement, if any modification or adjustment is made to the composition or calculation of the Index in accordance with Section 10.2 (*Adjustment procedures, notification and consultation process*), the Index Sponsor will make such modifications or adjustments based on market conditions and other relevant factors as in the judgment of the Index Sponsor are necessary to ensure that the Index continues to reflect, as closely as possible, the underlying economic interest it is designed to represent.

10.3 Consequences of Fund Events

If the Index Sponsor determines that a Fund Event has occurred in respect of a Fund (a "**Relevant Fund**"), then the procedures under Section 10.1 (*Adjustment Events*) will apply. Any such adjustments made in accordance with the foregoing may include adjustments to account for the Removal Value of the Fund Interest in respect of such Relevant Fund instead of the Underlying Fund Price and, if relevant, an amount determined by the Index Sponsor in respect of interest (compounded on a daily basis) on the Removal Value of the Fund Interest in respect of such Relevant Fund accrued at an overnight rate relating to the Index Currency selected by the Index Sponsor from (and including) the date on which any replacement of the Relevant Fund is effective.

Where it is required to determine a valuation of the Relevant Fund for the purposes of this Section 10.3 (*Consequences of Fund Events*) by reference to the Underlying Fund Price of the Fund Interest in respect of such Relevant Fund, the Index Sponsor shall determine the mechanics for calculating such valuation of the Fund Interest in respect of such Relevant Fund (which valuation may be zero) by reference to such sources as it considers appropriate including, but not limited to, the value that a third party on arms' length terms would be willing to pay for the transfer to it of such Fund Interest in respect of the Relevant Fund (or the portion of a hypothetical derivative contract in so far as it relates to the Fund Interest in respect of the Relevant Fund and does not take into account the creditworthiness of any party thereto).

11. Errors and Corrections

If:

- (i) any Index Component Value in respect of any Index Component or other variable, input or other parameter that is used to calculate the Index is subsequently changed or corrected and the change or correction is published by the relevant Index Component Price Source or other data source (as applicable); or
- (ii) the Index Calculation Agent identifies an error or omission in any of its calculations or determinations with respect to the Index Level in respect of any Index Business Day (including, without limitation, following an incorrect implementation of the methodology set out in this Description, an error in data entry, or a manual or system error),

then, in each case, the Index Sponsor may correct and restate any published Index Level in respect of any relevant Index Business Day (including, without limitation, a correction and restatement of the Index Level published for any relevant Index Business Day with retrospective effect) and/or each subsequent Index Business Day. Upon the occurrence of such event, the Index Calculation Agent shall inform the Index Sponsor and MSI plc promptly.

The Index Sponsor will determine whether such error requires a change in the composition or calculation of the Index and, if so, the procedures under Section 10.2 (*Adjustment procedures, notification and consultation process*) will apply.

12. Governance

Morgan Stanley has adopted the “Principles for Financial Benchmarks” published by the International Organization of Securities Commissions (“**IOSCO**”) on 17 July 2013 (the “**Principles**”) on a proportionate basis.

The Index and this Description have been approved in accordance with and are subject to the internal governance procedures implemented by Morgan Stanley in compliance with the Principles and managed by an internal oversight committee (the “**Index Committee**”).

The functions of calculation and valuation of the Index on each Index Business Day, as described in this Description, are carried out by a separate team at Morgan Stanley which is organisationally independent from the Index Sponsor.

The remuneration of the team which carries out the function of the Index Calculation Agent is not linked to the performance of the Index.

13. Discontinuation

Notwithstanding Section 10 (*Adjustment and Disruption Provisions*), the Index Sponsor may, in its sole discretion, after consultation with the Index Committee (except where, in the circumstances set out under (iii) below, such consultation is not possible), discontinue calculating and publishing the Index at any time upon the occurrence of any of the following:

- (i) as outlined in Section 10 (*Adjustment and Disruption Provisions*), as the result of an Adjustment Event;
- (ii) the Index Sponsor and/or, where no successor to it is available in the determination of the Index Sponsor, the Index Calculation Agent terminates its index/strategy publication or calculation (as applicable) business;
- (iii) the Index Sponsor and/or the Index Calculation Agent is subject to a voluntary or involuntary liquidation, dissolution or winding-up or institutes or has instituted against it, by a regulator, supervisor or other similar official, a proceeding seeking a judgment of insolvency or bankruptcy or other similar;
- (iv) subject as provided by applicable law or regulation, the Index Sponsor determines that it shall no longer continue to publish the Index; and/or
- (v) the Index Sponsor determines in its sole and absolute discretion that the Index is or will be no longer representative of the economic reality it was intended to measure.

Upon any such discontinuance, the Index Sponsor will use commercially reasonable efforts to publicly announce such discontinuance as soon as is reasonably practicable prior to the effective date.

The Index Sponsor shall determine if a commercially reasonable alternative index, the sponsor of which is a member of the Morgan Stanley Group, is available for use as an alternative to the Index and, to the extent reasonably possible, it shall maintain the original Index in existence in order to facilitate an orderly transition to the alternative index.

14. Important Information

Complaints

The Morgan Stanley Group has a complaints management policy and procedures for receiving, investigating and retaining records concerning complaints, details of which can be provided on request by emailing complaintsms@morganstanley.com. If an investor has a complaint about the Morgan Stanley Group, they should raise it in the first instance with the employee acting for them. OVERVIEW OF THE MS NORDIC EQUITY FUND 13% INDEX

This section provides a narrative, non-technical explanation of the intended investment objective of the Index and its calculation methodology. The information in this section is by way of explanation of information appearing in the Index Rules. The Index is governed by the Index Rules and therefore a full understanding of the Index can only be achieved with a full reading of that section.

What is the Index?

The Index is a rules-based strategy denominated in SEK which aims to provide exposure to a weighted basket of one equity mutual fund, as described below (the “**Basket**”), whilst maintaining a volatility at or around 13% (the “**Target Volatility**”). To pursue this objective, the Index implements a daily “*Risk Control Mechanism*” which adjusts the exposure of the Index in response to the increases or decreases of the volatility of the Basket. When volatility increases, the Index reduces exposure to Basket and invests in a notional, non-interest bearing, cash investment. When the volatility decreases, the Index increases exposure to the Basket, up to a maximum exposure of 150%, and reduces its exposure to cash.

When the Index’s exposure to the Basket is higher than 100%, the Index uses a “leveraged” exposure to the underlying funds. Leverage refers to the practice of using debt to amplify potential returns, by allocating more than 100% of the Index to the underlying funds. The maximum leverage the Index can employ is capped at 150%.

Does the Index represent a physical investment in the Basket?

The Index can be described as a “notional” investment in the Basket or as a “synthetic portfolio” as there is no actual asset held in respect of the Index. The Index simply reflects a strategy calculated using the value of a theoretical investment in each of the relevant components.

What does “Excess Return” mean?

The Index is construed as an “**Excess Return**” asset. This means that the level of the Index is determined net of costs, such as the cost of funding and/or borrowing a hypothetical investor would incur investing in the notional assets that make up the Basket. In practical terms, an Excess Return investment represents the returns of a hypothetical investment in an asset, where such investment is funded with borrowed cash, thus incurring running interest. This is to be opposed to a Total Return investment which assumes that such investment is fully funded.

What does “Running Rate” mean?

The Index is calculated by deducting a 2.00% per annum* percentage rate (the “**Running Rate**”) applied daily pro rata to the Index value. This deduction will impact negatively the performance of the Index over time, meaning that the Index annual performance would be on average 2.00% lower than what it would otherwise be without such deduction.

*Per annum refers to a period of 360 calendar days.

How does the Risk Control Mechanism Work?

The Index targets a volatility at or around 13% by allocating exposure to the Basket based on the realised volatility of the Basket itself. The target weight assigned by the Index to the Basket on any business day is the ratio of 13% to the realised volatility of the Basket. The realised volatility of the Basket is measured using its returns within a 20-business day period ending 2 days prior to the time of calculation.

The realised volatility is a measure of the magnitude of changes in price of a given financial instrument. When the Fund experiences higher volatility, it means greater changes in its price. In such environment, exposure to the Fund can produce unpredictable results. Volatility can anticipate both a decline or a rebound in the Fund. A “volatility target” mechanism aims to achieve a target volatility so that, as volatility increases beyond the target, the Index reduces exposure to the Fund. In practical terms, when exposure to the Fund is reduced, the level of the Index is less sensitive to the volatility of such Fund and therefore will suffer less from a decline in the performance of the Fund. A “volatility target” mechanism can however also hinder

the ability to participate in any increase in the value of the Fund when high volatility is associated with underlying value increase.

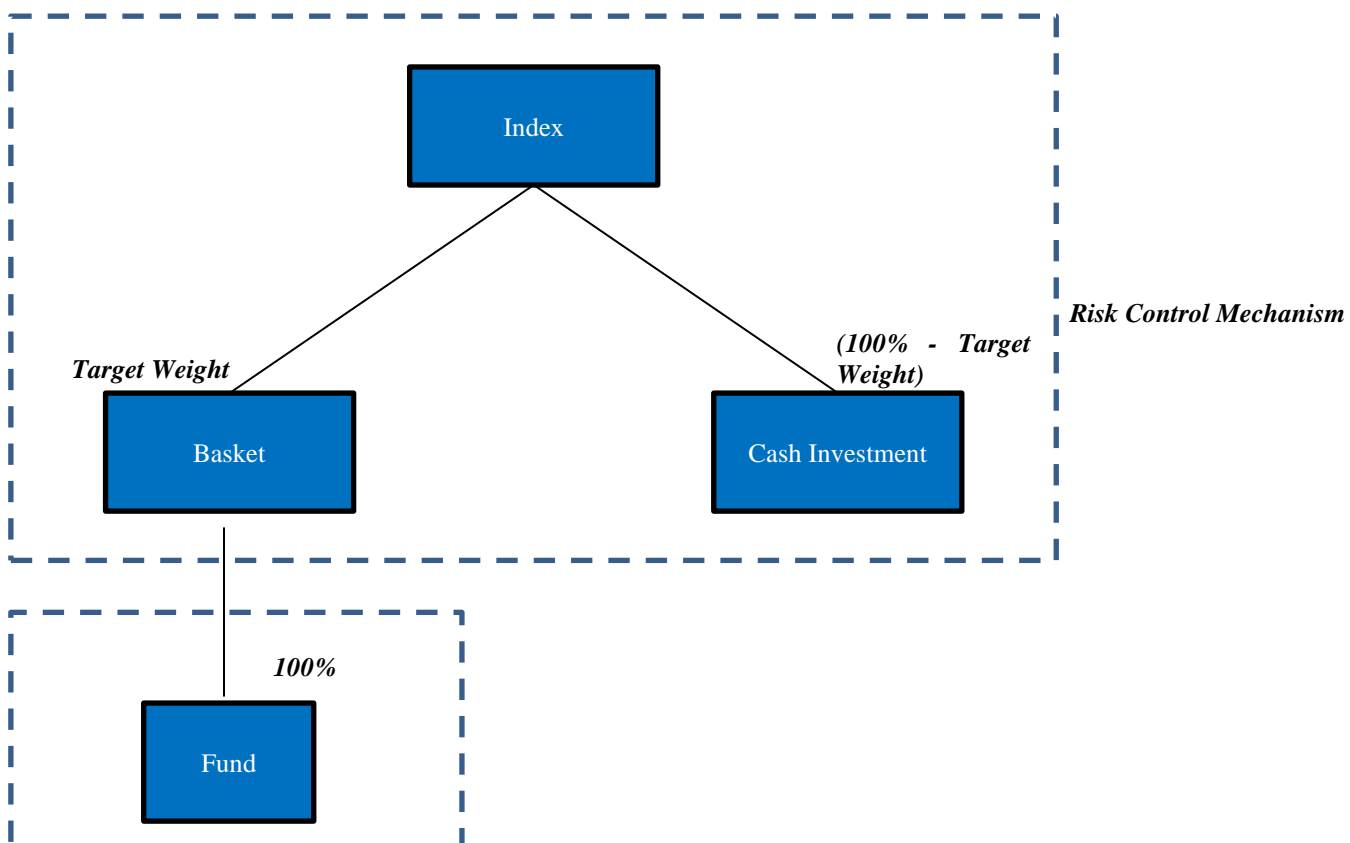

It should be highlighted that the minimum exposure to the Basket is 0% even when the Basket volatility has reached a level higher than the Target Volatility. As a result, exposure to the Basket cannot be negative.

Representation of the Index in Diagram

In the above diagram, the target weight represents the percentage weight assigned by the Index to the Basket which is determined by the Risk Control Mechanism.

What impacts the level of the Index?

The main driver of the level of the Index is the performance of the underlying Funds. In general terms, if the Funds increase in value, the Index level will increase as well and vice versa proportionally to the allocation percentage assigned by the Index to such Funds as determined by the Risk Control Mechanism.

However, the Index level is impacted by a number of other components as follows:

- The Index is determined by deducting the cost of funding and/or borrowing a hypothetical investor would incur investing in the Funds that make up the Basket. This cost is represented by the Stockholm Interbank 3-month rate. The higher the borrowing rates, the lower the performance of the Index. In an environment where borrow rates are significant, the Index may exhibit material underperformance when compared to a direct investment in the underlying Funds.
- The Index is calculated by deducting a 2.00% per annum Running Rate percentage rate, which is deducted daily pro rata. This means that the Index annual performance would be on average 2.00% lower than what it would otherwise be without such Running Rate.
