B.3 *What are the key risks that are specific to the Issuer?*

• **Risk Relating to the Issuer**

Holders of Securities issued by the Issuer bear the credit risk of the Issuer, that is the risk that the Issuer is not able to meet its obligations under such Securities, irrespective of whether such Securities are referred to as capital or principal protected or how any principal, interest or other payments under such Securities are to be calculated. If the Issuer is not able to meet its obligations under the Securities, then that would have a significant negative impact on the investor's return on the Securities and an investor may lose up to its entire investment. The existence of substantial inter-relationships (including the provision of funding, capital, services and logistical support to or by MSI plc, as well as common or shared business or operational platforms or systems, including employees) between MSI plc and other Morgan Stanley Group companies exposes MSI plc to the risk that, factors which could affect the business and condition of Morgan Stanley or other companies in the Morgan Stanley Group may also affect the business and condition of MSI plc. Further, Securities issued by MSI plc will not be guaranteed by Morgan Stanley. The application of regulatory requirements and strategies in the United Kingdom to facilitate the orderly resolution of large financial institutions may pose a greater risk of loss for the holders of securities issued by MSI plc.

The following key risks affect Morgan Stanley and, since Morgan Stanley is the ultimate holding company of MSI plc, also impact MSI plc:

• **Risks relating to the financial situation of Morgan Stanley**

Morgan Stanley's results of operations may be materially affected by market fluctuations and by global and economic conditions and other factors, including changes in asset values. Holding large and concentrated positions may expose Morgan Stanley to losses. These factors may result in losses for a position or portfolio owned by Morgan Stanley. Morgan Stanley's results of operations may be adversely affected by the COVID-19 pandemic.

Morgan Stanley is exposed to the risk that third parties that are indebted to it will not perform their obligations, as well as that a default by a large financial institution could adversely affect financial markets. Such factors give rise to the risk of loss arising when a borrower, counterparty or issuer does not meet its financial obligations to Morgan Stanley.

Liquidity is essential to Morgan Stanley's businesses and Morgan Stanley relies on external sources to finance a significant portion of its operations. Morgan Stanley's borrowing costs and access to the debt capital markets depend on its credit ratings. Morgan Stanley is a holding company, has no operations and depends on dividends, distributions and other payments from its subsidiaries. Further, Morgan Stanley's liquidity and financial condition have in the past been, and in the future could be, adversely affected by U.S. and international markets and economic conditions. As a result of the foregoing, there is a risk that

Morgan Stanley will be unable to finance its operations due to a loss of access to the capital markets or difficulty in liquidating its assets.

- **Risks relating to the operation of Morgan Stanley's business activities**

Morgan Stanley is subject to operational risks, including a failure, breach or other disruption of its operations or security systems or those of Morgan Stanley's third parties (or third parties thereof), which could adversely affect its businesses or reputation. A cyber-attack, information or security breach or a technology failure could adversely affect Morgan Stanley's ability to conduct its business, manage its exposure to risk or result in disclosure or misuse of confidential or proprietary information and otherwise adversely impact its results of operations, liquidity and financial condition, as well as cause reputational harm.

Morgan Stanley's risk management strategies, models and processes may not be fully effective in mitigating its risk exposures in all market environments or against all types of risk. Further, the expected replacement of London Interbank Offered Rate and replacement or reform of other interest rates could adversely affect Morgan Stanley's business, financial condition and results of operations.

- **Legal, Regulatory and Compliance Risk**

Morgan Stanley is subject to the risk of legal or regulatory sanctions, material financial loss including fines, penalties, judgments, damages and/or settlements, or loss to reputation it may suffer as a result of its failure to comply with laws, regulations, rules, related self-regulatory organization standards and codes of conduct applicable to its business activities. Morgan Stanley is also subject to contractual and commercial risk, such as the risk that a counterparty's performance obligations will be unenforceable. Additionally, Morgan Stanley is subject to anti-money laundering, anti-corruption and terrorist financing rules and regulations.

- **Other risks relating to Morgan Stanley's business activities**

Morgan Stanley faces strong competition from other financial services firms, which could lead to pricing pressures that could materially adversely affect its revenue and profitability. Further, automated trading markets may adversely affect Morgan Stanley's business and may increase competition.

Morgan Stanley is subject to numerous political, economic, legal, tax, operational, franchise and other risks as a result of its international operations (including risks of possible nationalization, expropriation, price controls, capital controls, exchange controls, increased taxes and levies and other restrictive governmental actions, as well as the outbreak of hostilities or political and governmental instability) which could adversely impact its businesses in many ways. The UK's withdrawal from the EU could adversely affect Morgan Stanley.

Morgan Stanley may be unable to fully capture the expected value from acquisitions, divestitures, joint ventures, minority stakes or strategic alliances.

The application of regulatory requirements and strategies in the United States or other jurisdictions to facilitate the orderly resolution of large financial institutions may pose a greater risk of loss for Morgan Stanley's security holders and subject Morgan Stanley to other restrictions.

C.2	<i>Where will the Securities be traded?</i>
------------	---

Application is expected to be made by the Issuer (or on its behalf) for the Securities to be admitted to trading on Euronext Dublin with effect from on or around the Issue Date.

C.3	<i>What are the key risks that are specific to the Securities?</i>
------------	--

- The Securities are not deposits or savings accounts and are not insured by the U.S. Federal deposit insurance corporation, the UK Financial Services Compensation Scheme, or any other governmental agency or instrumentality or deposit protection scheme anywhere, nor are they obligations of, or guaranteed by, a bank.
- The terms of the Securities differ from those of ordinary debt securities because the Securities, depending on the performance of the worst performing underlying Index at any relevant time, may pay a limited amount or no interest and, upon maturity, may return less than the amount initially invested.

	<ul style="list-style-type: none"> • An Issuer may amend the terms and condition of the Securities and the deed of covenant dated 17 July 2013 (as amended or supplemented from time to time) in relation to, amongst others, the Securities, without Securityholder consent if, in its opinion, such amendments are not materially prejudicial to Securityholders. • An investment in the Securities bears the risk that the Issuer is not able to fulfil its obligations in respect of such Securities at maturity or before maturity of the Securities. In certain circumstances, holders may lose all or a substantial portion of their principal or investment. • The Issuer has the right to withdraw the offering of the Securities and cancel the issuance of the Securities prior to the end of the subscription period for any reason. Reasons for the cancellation of the offer include, in particular: (i) adverse market conditions, as determined by the Issuer in its reasonable discretion (such as, for example, increased equity market volatility and increased currency exchange rate volatility); or (ii) that the number of applications received at that time is insufficient, in the Issuer’s opinion, to make an economically viable issuance. • “Benchmarks” are subject to recent national, international and other regulatory reforms, which could have a material impact on any Securities linked to a “benchmark” index, including in any of the following circumstances: (i) certain “benchmarks” may be discontinued, or (ii) the administrator(s) of a “benchmark” may not obtain authorisation/registration or not be able to rely on one of the regimes available to non-EU benchmarks. Depending on the particular “benchmark” and the applicable terms of the Securities, the occurrence of such a circumstance may lead to such benchmark being deemed replaced with an alternative benchmark selected by the Determination Agent, adjustment to the terms and conditions of the Securities or early redemption of the Securities. Any of the above consequences could have a material adverse effect on the value of and return on any such Securities. • Indices are comprised of a synthetic portfolio of other assets, and the performance of an Index may be dependent on the performance of such assets. Returns on the Securities do not reflect a direct investment in underlying shares or other assets comprising an Index. A change in the composition or discontinuance of an Index could adversely affect the market value of the Securities. The Securities are not sold or promoted by any Index or the sponsor of such Index. The Issuer or its affiliates are not liable for the actions or omissions of any Index, any information concerning such Index, the performance of such Index or use thereof in connection with the Securities. • The investors will bear the risk of the performance of each Index. A high correlation Indices may have a significant effect on amounts payable under the Securities. The negative performance of a single Index may outweigh a positive performance of one or more other Indices, as the amounts payable in respect of the Securities are linked to the value/performance of the worst performing Index, irrespective on the value/performance of the other Indices comprising the basket. • It is impossible to predict how the level of the Indices will vary over time. The historical performance (if any) of an Index does not indicate the future performance of such Index. Factors such as volatility, interest rates, remaining term of the Securities or exchange rates will influence the price investors will receive if an investor sells its Securities prior to maturity.
