INTERIM DIRECTORS' REPORT

The Directors present their interim report and condensed interim financial statements (which comprise the condensed statement of comprehensive income, the condensed statement of changes in equity, the condensed statement of financial position, the condensed statement of cash flows, and the related notes, 1 to 12) for Morgan Stanley Finance II Ltd (the "Company") for the period ended 30 June 2025.

RESULTS AND DIVIDENDS

The profit for the period, after tax was \$544,000 (period ended June 2024: \$341,000).

During the period, no dividends were paid or proposed (year ended December 2024: \$nil).

PRINCIPAL ACTIVITY

The principal activity of the Company is the issuance of financial instruments and the hedging of the obligations arising pursuant to such issuances.

The Company's ultimate parent undertaking and controlling entity is Morgan Stanley, which, together with the Company and Morgan Stanley's other subsidiary undertakings, form the "Morgan Stanley Group". There have been no significant changes in the Company's principal activity in the period under review and no significant change in the Company's principal activity is expected.

BUSINESS REVIEW

Exposure to risk factors and the current business environment in which it operates may impact business results of the Company's operations.

Risk factors

Risk is an inherent part of the Company's business activities. The Company seeks to identify, assess, monitor and manage each of the various types of risk involved in its business activities, in accordance with defined policies and procedures.

The Morgan Stanley Group Risk Appetite Statement articulates the aggregate level and type of risk that the Group is willing to accept in order to execute its business strategy.

The Morgan Stanley Group has an established Risk Management Framework to support the identification, monitoring and management of risk.

A description of the material risks and how these risks are managed is outlined in the 'Risk Management' section.

Business environment

In the first half of 2025, the economic environment reflected varied market conditions. Early in the year there was economic uncertainty and market volatility driven by global trade concerns that influenced client confidence and investor sentiment. The latter part of the period was characterised by a steady rebound in global capital markets. Ongoing geopolitical uncertainty, trade policy changes, inflation, as well as the timing and pace of central bank actions have impacted and could continue to impact capital markets and the Company, as discussed further in 'Overview of the period to June'25'.

INTERIM DIRECTORS' REPORT

BUSINESS REVIEW (CONTINUED)

Overview of the period to June 2025

The issued structured notes expose the Company to the risk of changes in market prices of the underlying securities, interest rate risk and, where denominated in currencies other than US dollars, the risk of changes in exchange rates between the US dollar and the other relevant currencies. The Company enters into derivative transactions with other Morgan Stanley Group undertakings to hedge the market price, interest rate and foreign currency risks associated with the issuance of the structured notes.

The condensed statement of comprehensive income is set out on page 10. The profit for the period is \$544,000, which primarily represents interest income from intercompany funding (period ended June 2024: \$341,000). The increase in profit during the period is driven by an increase in the average funding balance. The net trading income and the net expense on other financial instruments held at fair value through profit and loss for the period is \$nil (period ended June 2024: \$nil) which is consistent with the Company's principal activity.

The condensed statement of financial position is set out on page 12. Total assets and total liabilities as at 30 June 2025 were \$637,012,000 (year ended December 2024: \$648,637,000) and \$624,518,000 (year ended December 2024: \$636,687,000), respectively. The decrease in total assets and total liabilities from 31 December 2024 is due to changes in fair value movement driven by rate volatility and net redemption of notes during the current year.

The performance of the Company is included in the results of the Morgan Stanley Group. The Company's Directors believe that providing further performance indicators for the Company itself would not enhance an understanding of the development, performance, or position of the business of the Company.

The risk management section below sets out the Company's and the Morgan Stanley Group's policies for the management of liquidity and cash flow risk and other significant business risks.

Risk management

Risk is an inherent part of the Company's business activities. The Company seeks to identify, assess, monitor and manage each of the various types of risk involved in its business activities, in accordance with defined policies and procedures. The Company is managed as part of the policies and procedures of the Morgan Stanley Group's risk management policy framework. The risk management policy framework includes escalation to the appropriate senior management personnel when necessary.

Note 17 to the 2024 annual financial statements provides more detailed qualitative disclosures on the Company's exposure to financial risks. Note 9 to the condensed financial statements provides more detailed quantitative disclosures.

Set out below is an overview of the Company's policies for the management of financial risk and other significant business risk.

Market risk

Market risk refers to the risk that a change in the level of one or more market prices, rates, spreads, indices, implied volatilities, correlations or other market factors, such as market liquidity, will result in losses for a position or portfolio.

INTERIM DIRECTORS' REPORT

BUSINESS REVIEW (CONTINUED)

Risk management (continued)

Market risk (continued)

The Company's market risk associated with its trading activities at a legal entity, trading division and at an individual product level is managed as part of the Morgan Stanley Group's market risk management policy framework.

The Morgan Stanley Group's market risk management policy framework ensures transparency of material market risks, monitors compliance with established limits, and escalates risk concentrations to appropriate senior management when necessary.

It is the policy and objective of the Company not to be exposed to net market risk.

Credit risk

Credit risk refers to the risk of loss arising when a borrower, counterparty or issuer does not meet its financial obligations to the Company. Credit risk includes country risk, which is further described below.

The Morgan Stanley Group's credit risk management policies and procedures, of which the Company is a part, includes escalation to the appropriate senior management personnel when necessary.

Credit risk exposure is managed on a global basis and in consideration of each significant legal entity within the Morgan Stanley Group. The credit risk management policies and procedures establish the framework for the identification, measurement, monitoring, reporting, challenge and escalation of credit risk whilst ensuring transparency of material credit risks and compliance with established limits, requisite approvals for extensions of credit and escalation of risk concentrations to appropriate senior management.

Additional information on the primary credit exposures, credit risk management and mitigation, exposure to credit risk, including the maximum exposure to credit risk by credit rating is presented in note 9.

Country risk exposure

Country risk is the risk that events in, or affecting, a foreign country might adversely affect the Company. "Events" can include changes to global trade policies, the implementation of tariffs or imposition of capital controls resulting from numerous risks such as tensions between the US and China. "Foreign country" means any country other than Jersey.

Sovereign risk, by contrast, is the risk that a government will be unwilling or unable to meet its debt obligations or will renege on the debt that it guarantees. Sovereign risk is single-name risk for a sovereign government, its agencies and guaranteed entities.

The Company enters into the majority of its financial asset transactions with the parent entity, Morgan Stanley, in the United States of America ("USA"). As a result of the implicit support that would be provided by Morgan Stanley, the Company's country risk is considered a component of the Morgan Stanley Group's credit risk.

For further information on how the Company identifies, monitors and manages country risk exposure refer to page 3 of the Directors' report of the Company's 2024 annual financial statements.

INTERIM DIRECTORS' REPORT

BUSINESS REVIEW (CONTINUED)

Risk management (continued)

Liquidity risk

Liquidity risk refers to the risk that the Company will be unable to finance its operations due to a loss of access to capital markets or difficulty in liquidating its assets. Liquidity risk also encompasses the Company's ability (or perceived ability) to meet its financial obligations without experiencing significant business disruption or reputational damage that may threaten its viability as a going concern. Liquidity risk also encompasses the associated funding risks triggered by the market or idiosyncratic stress events that may cause unexpected changes in funding needs or an inability to raise new funding.

For further discussion on the Company's liquidity risk refer to page 4 of the Directors' report in the Company's 2024 annual financial statements.

Valuation risk

Valuation risk represents the possibility that a valuation estimate of a position would differ from the amount observed in a close-out transaction due to uncertainty around the actual price that could be obtained.

Valuation Control ("VC") within Finance is responsible for the Company's valuation policies and procedures which ensure compliance with the relevant accounting standards and regulatory requirements. VC implements valuation control processes designed to validate the fair value of the Company's financial instruments measured at fair value including those derived from pricing models.

Operational risk

Operational risk refers to the risk of loss, or of damage to the Company's reputation, resulting from inadequate or failed processes, people and systems, or from external events (e.g. fraud, theft, legal, regulatory and compliance risks, cyberattacks or damage to physical assets). Operational risk relates to the following risk event categories as defined by Basel Capital Standards: internal fraud; external fraud; employment practices and workplace safety; clients, products and business practices; business disruption and system failure; damage to physical assets; and execution, delivery and process management.

The Company is exposed to operational risk across the full scope of its business activities. The scope also includes oversight of technology risk, cybersecurity risk, information security risk, and third party risk management (supplier and affiliate risk).

For further discussion on the Company's operational risk refer to pages 4, 5 and 6 of the Directors' report in the Company's 2024 annual financial statements.

Culture, values and conduct of employees

The Company's culture is built on the core values of the Morgan Stanley Group - *Put Clients First, Do the Right Thing, Lead with Exceptional Ideas, Commit to Diversity and Inclusion and Give Back.* Leadership, including from the Board, sets the tone for the Company, and the executive team drive a culture that is central to how the Company serves clients, advances and develops the workforce, and how the Company supports the communities around it. The Morgan Stanley Group is committed to reinforcing and confirming adherence to the core values through our governance framework, tone from the top, management oversight, risk management and controls, and a three lines of defence structure (risk owners within the business, Independent Risk Management functions, including the Financial Risk Management and Non-Financial Risk Management functions, and Internal Audit).

INTERIM DIRECTORS' REPORT

BUSINESS REVIEW (CONTINUED)

Risk management (continued)

Culture, values and conduct of employees (continued)

The Morgan Stanley Group's Board is responsible for overseeing the Morgan Stanley Group's practices and procedures relating to culture, values and conduct. The Morgan Stanley Group's Senior management committees oversee the Morgan Stanley-wide culture, values and conduct program and report regularly to the Morgan Stanley Group Board. A fundamental building block of these programs is the Morgan Stanley Group's Code of Conduct (the "Code") which establishes standards for employee conduct that further reinforce the Morgan Stanley Group's commitment to integrity and ethical conduct. Every new hire and every employee annually is required to attest to their understanding of and adherence to the Code of Conduct. Morgan Stanley's Global Conduct Risk Management Policy also sets out a consistent global framework for managing conduct risk (i.e., the risk arising from misconduct by employees or contingent workers) and conduct risk incidents.

Morgan Stanley's remuneration policies and practices ensure that there is an alignment between reward, risk, culture and conduct. Conduct, culture, and core values are considered in the employee annual performance evaluation process. The performance review process also includes evaluation of employee conduct related to risk management practices and the Morgan Stanley Group's expectations. The Morgan Stanley Group also has several mutually reinforcing processes to identify employee conduct that may have an impact on employment status, current year compensation and/or prior year compensation.

Going concern

Business risks associated with the uncertain market and economic conditions are being actively monitored and managed by the Company. Retaining sufficient liquidity and capital to withstand market pressures remains central to the Company's strategy.

The effect of relevant macroeconomic scenarios on the business of the Company have been considered as part of the going concern analysis, including impact on operational capacity, access to liquidity and capital, contractual obligations, asset valuations and other critical accounting judgements and key sources of estimation uncertainty.

Taking the above factors into consideration, the Directors believe it is reasonable to assume that the Company will have access to adequate resources to continue in operational existence for the foreseeable future being at least 12 months from the date of approval of these financial statements. Accordingly, they continue to adopt the going concern basis in preparing the interim report and condensed interim financial statements.

INDEPENDENT REVIEW REPORT TO MORGAN STANLEY FINANCE II LTD

Conclusion

We have been engaged by the Company to review the condensed set of financial statements in the half-yearly financial report for the six months ended 30 June 2025 which comprises the condensed statement of comprehensive income, the condensed statement of changes in equity, the condensed statement of financial position, the condensed statement of cash flows and related notes 1 to 12.

Based on our review, nothing has come to our attention that causes us to believe that the condensed set of financial statements in the half-yearly financial report for the six months ended 30 June 2025 is not prepared, in all material respects, in accordance with European Union adopted International Accounting Standard 34 'Interim Financial Reporting'.

Basis for Conclusion

We conducted our review in accordance with International Standard on Review Engagements (UK) 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Financial Reporting Council for use in the United Kingdom (ISRE (UK) 2410). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing (UK) and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

As disclosed in note 2, the annual financial statements of the Company are prepared in accordance with International Financial Reporting Standards ("IFRSs") as adopted by the European Union ("EU") and Interpretations issued by the IFRS Interpretations Committee ("IFRIC"). The condensed set of financial statements included in this half-yearly financial report has been prepared in accordance with International Accounting Standard ("IAS") 34 'Interim Financial Reporting', as adopted by the EU.

Conclusion Relating to Going Concern

Based on our review procedures, which are less extensive than those performed in an audit as described in the Basis for Conclusion section of this report, nothing has come to our attention to suggest that the directors have inappropriately adopted the going concern basis of accounting or that the directors have identified material uncertainties relating to going concern that are not appropriately disclosed.

This conclusion is based on the review procedures performed in accordance with this ISRE (UK) 2410; however future events or conditions may cause the entity to cease to continue as a going concern.

Responsibilities of the directors

The directors are responsible for preparing the half-yearly financial report in accordance with IFRSs as adopted by the EU and Interpretations issued by the IFRIC.

In preparing the half-yearly financial report, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

INDEPENDENT REVIEW REPORT TO MORGAN STANLEY FINANCE II LTD

Auditor's Responsibilities for the review of the financial information

In reviewing the half-yearly financial report, we are responsible for expressing to the Company a conclusion on the condensed set of financial statements in the half-yearly financial report. Our Conclusion, including our Conclusion Relating to Going Concern, are based on procedures that are less extensive than audit procedures, as described in the Basis for Conclusion paragraph of this report.

Use of our report

This report is made solely to the company in accordance with ISRE (UK) 2410. Our work has been undertaken so that we might state to the Company those matters we are required to state to it in an independent review report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company, for our review work, for this report, or for the conclusions we have formed.

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

1. CORPORATE INFORMATION

The Company is incorporated and domiciled in Jersey, at the following address: 47 Esplanade, St. Helier, Jersey, JE1 0BD. The Company is a public limited company engaged in the issuance of financial instruments and the hedging of the obligations arising pursuant to such issuances. The registered number of the Company is 35857.

The Company's ultimate parent undertaking and controlling entity and the largest group of which the Company is a member and for which group financial statements are prepared is Morgan Stanley which, together with the Company and Morgan Stanley's other subsidiary undertakings, form the Morgan Stanley Group. Morgan Stanley has its registered office c/o The Corporation Trust Company, The Corporation Trust Center, 1209 Orange Street, Wilmington, DE 19801, United States of America and is incorporated in the State of Delaware, in the United States of America. Copies of its financial statements can be obtained from www.morganstanley.com/investorrelations.

2. BASIS OF PREPARATION

Statement of compliance

The Company has prepared the annual financial statements in accordance with IFRSs as adopted by the EU, Interpretations issued by the IFRS Interpretations Committee ("IFRIC") and Companies (Jersey) Law 1991.

The condensed interim financial statements have been prepared in accordance with International Accounting Standard ("IAS") 34 'Interim Financial Reporting', as adopted by the EU.

In preparing these condensed interim financial statements, the Company has applied consistently the accounting policies and methods of computation used in the Company's annual financial statements for the year ended 31 December 2024, except where otherwise stated.

New standards and interpretations adopted during the period

The following amendments to standards relevant to the Company's operations were adopted during the year. Except where otherwise stated, these amendments to standards and interpretations did not have a material impact on the Company's condensed interim financial statements.

Amendments to IAS 21 'The Effects of Changes in Foreign Exchange Rates': Lack of Exchangeability were issued by the IASB in August 2023 for prospective application in accounting periods beginning on or after 1 January 2025. The amendments were endorsed by the EU in November 2024.

There were no other standards, amendments to standards or interpretations relevant to the Company's operations which were adopted during the period.

New standards and interpretations not yet adopted during the period

At the date of authorisation of these financial statements, the following standard and amendments to standards relevant to the Company's operations were issued by the IASB but not mandatory for accounting periods beginning 1 January 2025.

Amendments to IFRS 9 'Financial Instruments' ("IFRS 9") and IFRS 7 'Financial Instruments: Disclosures' ("IFRS 7") were issued by the IASB in May 2024 for retrospective application in annual periods beginning on or after 1 January 2026. Earlier application is permitted. The Company is currently assessing the impact of the amendments to IFRS 9 and IFRS 7 on its financial statements.

IFRS 18 'Presentation and Disclosure in Financial Statements' ("IFRS 18") was issued by the IASB in April 2024 for retrospective application in annual periods beginning on or after 1 January 2027. Earlier application is permitted. The Company is currently assessing the impact of IFRS 18 on its financial statements.

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

2. BASIS OF PREPARATION (CONTINUED)

New standards and interpretations not yet adopted during the period (continued)

Annual improvements to IFRS 7 'Financial Instruments: Disclosures', IFRS 9 'Financial Instruments', IFRS 10 'Consolidated Financial Statements' and IAS 7 'Statement of Cash flows' were issued by IASB in July 2024, for application in annual periods beginning on or after 1 January 2026. Earlier application is permitted.

Basis of measurement

The financial statements of the Company are prepared under the historical cost basis, except for certain financial instruments that have been measured at fair value as explained in the accounting policies below.

Critical accounting judgements and key sources of estimation uncertainty

In preparing the condensed interim financial statements, the Company makes judgements and estimates that affect the application of accounting policies and reported amounts.

Critical accounting judgements are key decisions made by management in the application of the Company's accounting policies, other than those involving estimations, which have the most significant effects on the amounts recognised in the condensed interim financial statements.

Key sources of estimation uncertainty represent assumptions and estimations made by management that have a significant risk of resulting in a material adjustment to the carrying amount of assets and liabilities within the next financial year.

The key source of estimation uncertainty is the valuation of Level 3 financial instruments. Valuation techniques used to measure the fair value of instruments categorised in Level 3 of the fair value hierarchy are dependent on unobservable parameters, and as such require the application of judgement, involving estimations and assumptions. The fair value for these financial instruments has been determined using parameters appropriate for the valuation methodology based on prevailing market evidence. It is recognised that the unobservable parameters could have a range of reasonably possible alternative values. See note 10(d)(2) 'Sensitivity of fair values to changing significant assumptions to reasonably possible alternatives'.

No critical accounting judgements have been made in the process of applying the Company's accounting policies that have had a significant effect on the amounts recognised in the condensed interim financial statements.

The Company evaluates the critical accounting judgements and key sources of estimation uncertainty on an ongoing basis and believes that these are reasonable.

The going concern assumption

The Company's business activities, together with the factors likely to affect its future development, performance and position, are reflected in the Business Review section of the Directors' report on pages 1 to 6. In addition, the notes to the condensed interim financial statements include the Company's objectives, policies and processes for managing its capital; its financial risk management objectives; details of its financial instruments; and its exposures to credit risk and liquidity risk.

As set out in the Directors' report, retaining sufficient liquidity and capital to withstand market pressures remains central to the Morgan Stanley Group's and the Company's strategy.

Taking the above factors into consideration, the Directors believe it is reasonable to assume that the Company will have access to adequate resources to continue in operational existence for the foreseeable future being at least 12 months from the date of approval of these financial statements. Accordingly, they continue to adopt the going concern basis in preparing the interim report and condensed interim financial statements.

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

3. NET EXPENSE ON OTHER FINANCIAL INSTRUMENTS HELD AT FAIR VALUE

Net expense on:	(unaudited) Six months ended 30 June 2025 \$'000	(unaudited) Six months ended 30 June 2024 \$'000
Financial assets designated at fair value through profit or loss ("FVPL"):

Loans	2,790	3,773
Financial liabilities designated at FVPL:		
Debt and other borrowings:		
Issued structured notes	(58,392)	(17,662)
	(55,602)	(13,889)

4. INTEREST INCOME

All interest income relates to financial asset at amortised cost and is calculated using the effective interest rate ("EIR") method.

No other gains or losses have been recognised in respect of financial assets measured at amortised cost other than as disclosed as 'Interest income' and 'Net impairment loss on financial assets'.

5. INCOME TAX

The Company is subject to Jersey income tax at the rate 0.00% (2024: 0.00%).

The Company is subject to the OECD Pillar Two Model Rules legislation that is effective from 1 January 2025. The Company has applied the exception to deferred tax recognition and disclosure as provided in the amendments to IAS 12: International Tax Reform – Pillar Two Model Rules. Based on preliminary assessments of potential future exposure, the financial impact is expected to be immaterial.

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

6. FINANCIAL ASSETS AND FINANCIAL LIABILITIES BY MEASUREMENT CATEGORY (CONTINUED)

There are no terms and conditions of any trading financial assets or liabilities that may individually significantly affect the amount, timing and certainty of future cash flows for the Company.

Financial assets and financial liabilities designated at FVPL

A further breakdown of financial assets and financial liabilities designated at FVPL is provided within the table above. The financial assets and liabilities in the table above which are designated at FVPL consist primarily of the following financial assets and financial liabilities:

Issued Structured Notes: These relate to financial liabilities which arise from selling structured products generally in the form of notes. These instruments contain an embedded derivative which significantly modifies the cash flows of the issuance. The return on the instrument is linked to an underlying that is not clearly and closely related to the debt host including, but not limited to, equity-linked notes. These structured notes are designated at FVPL as the risks to which the Company is a contractual party are risk managed on a fair value basis as part of the Company's trading portfolio and the risk is reported to key management personnel on this basis.

Loans: These are loans to other Morgan Stanley Group undertakings that, along with the derivative contracts classified as mandatorily at FVPL, are part of the hedging strategy for the obligations arising pursuant to the issuance of the structured notes. These loans are designated at FVPL to eliminate or significantly reduce an accounting mismatch which would otherwise arise.

The Company determines the amount of changes in fair value attributable to changes in counterparty credit risk or own credit risk, as relating to loans and issued structured notes, by first determining the fair value including the impact of counterparty credit risk or own credit risk, and then deducting those changes in fair value representing managed market risk. In determining fair value, the Company considers the impact of changes in own credit spreads based upon observations of the secondary bond market spreads when measuring the fair value for issued structured notes. The Company considers that this approach most faithfully represents the amount of change in fair value due to both counterparty credit risk and the Company's own credit risk.

The carrying amount of financial liabilities held at fair value was \$227,000 lower than the contractual amount due at maturity (31 December 2024: \$111,000 lower).

At initial recognition of a specific structured note issuance program, the Company's issuance process, and any planned hedging structure relating to the issuance of those structured notes, has been considered, to determine whether the presentation of fair value changes attributable to credit risk of those structured notes through other comprehensive income would create or enlarge an accounting mismatch in the income statement. If financial instruments, such as derivatives and loans held at FVPL, for which changes in fair value incorporating counterparty credit risk are reflected within the income statement, are traded to economically hedge the structured note issuances in full, the fair value incorporating any counterparty credit risk arising on the hedging instruments may materially offset any changes in the credit risk of these liabilities ("DVA") applied to structured notes, where the counterparties of the hedging instruments are part of the Morgan Stanley Group. In such cases, the DVA of those structured notes is not reflected within other comprehensive income, and instead is presented in the condensed statement of comprehensive income.

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

6. FINANCIAL ASSETS AND FINANCIAL LIABILITIES BY MEASUREMENT CATEGORY (CONTINUED)

Financial assets and financial liabilities designated at FVPL (continued)

The following table presents the change in fair value and the cumulative change recognised in the statement of comprehensive income attributable to own credit risk for issued structured notes and counterparty credit risk for loans.

	statement of c	Gain or (loss) recognised in the statement of comprehensive income		Cumulative gain or (loss) recognised in the statement of comprehensive income			
	Six months ended 30 June 2025	ded 30 June ended 30 June		ended 30 June ended 30 June 30 June			
	\$'000	\$'000	\$'000	\$'000			
Issued structured notes	(721)	(2,286)	814	1,535			
Loans	721	2,286	(814)	(1,535)			

The following tables presents the carrying value of the Company's financial liabilities designated at FVPL, classified according to underlying security type, including, single name equities, equity indices and equity portfolio.

30 June 2025	Single name equities \$'000	Equity indices \$'000	Equity portfolio \$'000	Total \$'000
Issued Structured Notes	210,781	25,181	349,441	585,403
31 December 2024	Single name equities \$'000	Equity indices \$'000	Equity portfolio \$'000	Total \$'000
Issued Structured Notes	250,265	103,753	208,649	562,667

The derivative contracts and loans held at FVPL that the Company enters into in order to hedge the structured notes are valued as detailed in note 3(d) and note 18(a) of the Company's 2024 annual financial statements, and have similar valuation inputs to the liabilities they hedge.

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

7. DEBT AND OTHER BORROWINGS

	(unaudited)	(audited)
	30 June	31 December
	2025	2024
	\$'000	\$'000
Debt and other borrowings (designated FVPL)		
Issued structured notes	585,403	562,667

Refer to note 6 for details of issued structured notes included within debt and other borrowings designated at FVPL.

8. SEGMENT REPORTING

Segment information is presented in respect of the Company's business and geographical segments. The business and geographical segments are based on the Company's management and internal reporting structure. Transactions between business segments are on normal commercial terms and conditions.

Business segments

Morgan Stanley structures its business segments primarily based upon the nature of the financial products and services provided to customers and Morgan Stanley's internal management structure. The Company's own business segments are consistent with those of Morgan Stanley.

The Company has one reportable business segment, Institutional Securities, which provides financial services to financial institutions. Its business includes the issuance of financial instruments and the hedging of the obligations arising pursuant to such issuances.

Geographical segments

The Company operates in two geographic regions as listed below:

- Americas
- Asia

The following table presents selected condensed interim statement of financial position information of the Company's operations by geographic area. The total assets disclosed in the following table reflect the regional view of the Company's operations, on a managed basis. The attribution of total assets is determined by trading desk location.

	Americas		Asia		Total	
	30 Jun 2025 \$'000	31 Dec 2024 \$'000	30 Jun 2025 \$'000	31 Dec 2024 \$'000	30 Jun 2025 \$'000	31 Dec 2024 \$'000
External revenues net of interest						
Profit before income tax	544	682	_		544	682
Total assets	81,011	202,500	556,001	446,137	637,012	648,637

All of the Company's external revenue (2024: 100%) arises from transactions with other Morgan Stanley group undertakings.

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

9. FINANCIAL RISK MANAGEMENT

Risk management procedures

The Company's risk management procedures are consistent with those disclosed in the Company's 2024 annual financial statements. This disclosure is limited to quantitative data for each risk category and should be read in conjunction with the risk management procedures detailed in note 17 of the Company's 2024 annual financial statements.

Credit risk

Credit risk refers to the risk of loss arising when a borrower, counterparty or issuer does not meet its financial obligations to the Company. Primarily its concentration of exposure is to other Morgan Stanley Group undertakings.

Credit risk management

Credit risk exposure is managed on a global basis and in consideration of each significant legal entity within the Morgan Stanley Group. The credit risk management policies and procedures establish the framework for identifying, measuring, monitoring and controlling credit risk whilst ensuring transparency of material credit risks, compliance with established limits and escalating risk concentrations to appropriate senior management.

The Company enters into all of its financial asset transactions with other Morgan Stanley Group undertakings, and both the Company and the other Morgan Stanley Group undertakings are wholly-owned subsidiaries of the same ultimate parent entity, Morgan Stanley. As a result of the implicit support that would be provided by Morgan Stanley, the Company is considered exposed to the credit risk of Morgan Stanley.

Exposure to credit risk

The maximum exposure to credit risk ("gross credit exposure") of the Company as at 30 June 2025 is the carrying amounts of the financial assets held in the condensed interim statement of financial position. The table includes financial instruments subject to ECL and not subject to ECL. Those financial instruments that bear credit risk but are not subject to ECL are subsequently measured at fair value.

The Company does not have any significant exposure arising from items not recognised on the condensed interim statement of financial position.

Exposure to credit risk by class

	Gross and net ci	redit exposure ⁽¹⁾
Class	30 June 2025	31 December 2024
	\$'000	\$'000
Subject to ECL:		
Cash and short-term deposits	551	409
Trade and other receivables	10,942	11,970
Not subject to ECL ⁽²⁾ :		
Loans and advances	620,501	634,464
Trading financial assets	5,018	1,794
	637,012	648,637

⁽¹⁾ The carrying amount recognised in the condensed interim statement of financial position best represents the Company's maximum exposure to credit risk.

The Company does not hold financial assets considered to be credit impaired.

⁽²⁾ Financial assets measured at FVPL are not subject to ECL.

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

9. FINANCIAL RISK MANAGEMENT (CONTINUED)

Credit risk (continued)

Exposure to credit risk by internal rating grades

Internal credit ratings, as below, are derived using methodologies generally consistent with those used by external agencies:

Investment grade: AAA - BBB Non-investment grade: BB - CCC

Default: D

All gross carrying amounts have an internal rating grade of A and are not impacted by ECL. All exposures subject to ECL are Stage 1.

Liquidity risk

Liquidity risk refers to the risk that the Company will be unable to finance its operations due to a loss of access to capital markets or difficulty in liquidating its assets. Liquidity risk encompasses the Company's ability (or perceived ability) to meet its financial obligations without experiencing significant business disruption or reputational damage that may threaten the Company's viability as a going concern. Liquidity risk also encompasses the associated funding risks triggered by the market or idiosyncratic stress events that may cause unexpected changes in funding needs or an inability to raise new funding. Generally, the Company incurs liquidity risk as a result of its trading, lending, investing and client facilitation activities.

For further details please refer note 17 of 2024 annual financial statements.

Maturity analysis

In the following maturity analysis of financial assets and financial liabilities, derivative contracts and other financial instruments measured at fair value are presented at fair value, consistent with how these financial instruments are managed. All other amounts represent undiscounted cash flows payable by the Company arising from its financial assets and financial liabilities to earliest contractual maturities as at 30 June 2025 and as at 31 December 2024. Receipts of financial assets and repayments of financial liabilities that are subject to immediate notice are treated as if notice were given immediately and are classified as on demand. This presentation is considered by the Company to appropriately reflect the liquidity risk arising from those financial assets and financial liabilities, presented in a way that is consistent with how the liquidity risk on these financial assets and financial liabilities is managed by the Company.

9. FINANCIAL RISK MANAGEMENT (CONTINUED)

Market risk

Market risk is defined by IFRS 7 as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

The Company manages the market risk associated with its trading activities at a legal entity, trading division and at an individual products level.

Sound market risk management is an integral part of the Company's culture. The Company is responsible for ensuring that market risk exposures are well-managed and monitored. The Company also ensures transparency of material market risks, monitors compliance with established limits, and escalates risk concentrations to appropriate senior management.

To execute these responsibilities, the Morgan Stanley Group monitors the market risk of the firm against limits on aggregate risk exposures, performs a variety of risk analyses including monitoring Value-at-risk ("VaR") and stress testing analyses, routinely reports risk summaries and maintains the VaR and scenario analysis methodologies. The Company is managed within the Morgan Stanley Group's global framework. The market risk management policies and procedures of the Company include performing risk analyses and reporting any material risks identified to appropriate senior management of the Company, including an assessment of the condensed interim Statement of Comprehensive Income and Statement of Financial Position of the Company to ensure there is no net exposure to market risk.

The Company enters into the majority of its financial asset transactions with other Morgan Stanley Group undertakings, where both the Company and the other Morgan Stanley Group undertakings are wholly-owned subsidiaries of the same group parent entity, Morgan Stanley.

The Company actively manages its market risk by hedging with other Morgan Stanley Group undertakings. The residual market risk on the entity is not material.

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

10. ASSETS AND LIABILITIES MEASURED AT FAIR VALUE

a. Financial assets and liabilities recognised at fair value on a recurring basis

The following tables present the carrying value of the Company's financial assets and financial liabilities recognised at fair value on a recurring basis, classified according to the fair value hierarchy.

10. ASSETS AND LIABILITIES MEASURED AT FAIR VALUE (CONTINUED)

a. Financial assets and liabilities recognised at fair value on a recurring basis (continued)

The Company's valuation approach and fair value hierarchy categorisation for certain significant classes of financial instruments recognised at fair value on a recurring basis is as follows:

Derivatives Asset and Liability / Valuation Techniques	Valuation Hierarchy Classification
Derivatives	
 Over the counter ("OTC") Derivative Contracts OTC derivative contracts include swap contracts related to equity prices. Depending on the product and the terms of the transaction, the fair value of OTC derivative products can be modelled using a series of techniques, including closed-form analytic formulas, such as the Black-Scholes pricing model, simulation models or a combination thereof. Many pricing models do not entail material subjectivity as the methodologies employed do not necessitate significant judgement, since model inputs may be observed from actively quoted markets, as is the case for many equity swaps. In the case of more established derivative products, the pricing models used by the Company are widely accepted by the financial services industry. More complex OTC derivative products are typically less liquid and require more judgement in the implementation of the valuation technique since direct trading activity or quotes are unobservable. This includes certain types of derivatives with both volatility and correlation exposure. Where these inputs are unobservable, relationships to observable data points, based on historic and/or implied observations, may be employed as a technique to estimate the model input values. 	liquidity, or where the unobservable input is not deemed significant. • Level 3 - when valued using observable inputs with limited market liquidity, or is an unobservable input is deemed significant.
Issued structured notes	
 Issued structured notes designated at fair value through profit or loss The Company issues structured notes which are primarily composed of instruments whose payments and redemption values are linked to the performance of a specific index, a basket of stocks and a specific security. Fair value of structured notes is determined using valuation models for the derivative and debt portions of the structured notes and traded prepaid equity securities contracts. These models incorporate observable inputs referencing identical or comparable securities, including prices to which the notes are linked to equity prices. Independent, external and traded prices for the notes are considered as well as the impact of the Company's own credit spreads which are based on observed secondary bond market spreads. 	significant unobservable input.

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

10. ASSETS AND LIABILITIES MEASURED AT FAIR VALUE (CONTINUED)

a. Financial assets and liabilities recognised at fair value on a recurring basis (continued)

Issued structured notes (continued)	
Issued structured notes designated at fair value through profit or loss (continued)	
• Notes give a risk exposure tailored to market views and risk appetite and mainly provide exposure to the underlying single name equity, equity index or portfolio of equities. Typically, the redemption payment of the note is significantly dependent on the value of embedded equity derivatives. In general, call and put options, digital options, straddles and callability features are combined to create a bespoke coupon rate or redemption payoff for each note issuance, with risk exposure to one or more equity underlyings or indices. The Company values the embedded derivatives using market standard models, which are assessed for appropriateness at least annually. Model inputs, such as equity forward rates, equity implied volatility and equity correlations are marked such that the fair value of the derivatives match prices observable in the inter-dealer markets. In arriving at fair value, the Company uses discount rates appropriate to the funding rates specific to the instrument. In general, this results in overnight rates being used to discount the Company assets and liabilities. In addition, since the notes bear Morgan	
Stanley's credit risk, the Company considers this when assessing the fair value of the notes, by adjusting the discount rates to reflect the prevailing credit spread at the reporting date.	
Loans • The fair value of loans to other Morgan Stanley Group undertakings is estimated based on the present value of expected future cash flows using its best estimate of interest rate yield curves.	• Level 2

b. Transfers between Level 1 and Level 2 of the fair value hierarchy for financial assets and liabilities recognised at fair value on a recurring basis

There were no transfers between Level 1 and Level 2 of the fair value hierarchy during the current period and prior year.

c. Changes in Level 3 financial assets and liabilities recognised at fair value on a recurring basis

The following tables present the changes in the fair value of the Company's Level 3 financial assets and financial liabilities for the period ended 30 June 2025 and 31 December 2024. Level 3 instruments may be hedged with instruments classified in Level 1 and Level 2. The realised and unrealised gains/(losses) for assets and liabilities within the Level 3 category presented in the following tables do not reflect the related realised and unrealised gains/(losses) on hedging instruments that have been classified by the Company within the Level 1 and/ or Level 2 categories.

The unrealised gains/(losses) during the period for assets and liabilities within the Level 3 category presented in the following tables herein may include changes in fair value during the period that were attributable to both observable and unobservable inputs.

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

10. ASSETS AND LIABILITIES MEASURED AT FAIR VALUE (CONTINUED)

c. Changes in Level 3 financial assets and liabilities recognised at fair value on a recurring basis (continued)

30 June 2025

Total financial liabilities measured at fair value	(7,679)	(64)	_	(7,727)	1,810	_	2,193	(11,467)	(3,098)
at iaii vaiut	(1,017)	(04)		(1,121)	1,010		2,175	(11,107)	(5,576)

⁽¹⁾ The total gains or (losses) are recognised in the condensed interim statement of comprehensive income.

⁽²⁾ For financial assets and financial liabilities that were transferred into and out of Level 3 during the period, gains or (losses) are presented as if the assets or liabilities had been transferred into or out of Level 3 as at the beginning of the period.

⁽³⁾ Amounts represent unrealised gains or (losses) for the period ended 30 June 2025 related to assets and liabilities still outstanding at 30 June 2025. The unrealised gains or (losses) are recognised in the statement of comprehensive income.

⁽⁴⁾ Net derivative contracts represent trading financial assets – derivative contracts net of trading financial liabilities – derivative contracts.

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

10. ASSETS AND LIABILITIES MEASURED AT FAIR VALUE (CONTINUED)

c. Changes in Level 3 financial assets and liabilities recognised at fair value on a recurring basis (continued)

During the period, the Company reclassified \$3,916,000 of net derivative contracts (31 December 2024: \$2,193,000) from Level 3 to Level 2. The reclassifications are from various instruments due to increased level of observable transactions.

During the period, the Company reclassified \$6,266,000 of issued structured notes (31 December 2024: \$nil) from Level 3 to Level 2. The reclassifications are from various instruments due to increased level of observable transactions.

d. Valuation of Level 3 financial assets and liabilities recognised at fair value on a recurring basis

The following disclosures provide information on the sensitivity of fair value measurements to key inputs and assumptions.

1. Quantitative information about and qualitative sensitivity of significant unobservable inputs

The following table provides information on the valuation techniques, significant unobservable inputs and the ranges and averages for each material category of assets and liabilities measured at fair value on a recurring basis.

The level of aggregation and breadth of products cause the range of inputs to be wide and not evenly distributed across the inventory of financial instruments. Further, the range of unobservable inputs may differ across groups in the financial services industry because of diversity in the types of products included in each group's inventory. The following disclosures also include qualitative information on the sensitivity of the fair value measurements to changes in the significant unobservable inputs. There are no predictable relationships between multiple significant unobservable inputs attributable to a given valuation technique. A single amount is disclosed when there is no significant difference between the minimum, maximum and average (weighted average or similar average / median).

Fair value \$'000	Predominant valuation techniques/ Significant unobservable inputs	Range (Averages)
9	Option model	
	Equity volatility	N/M
	Equity volatility skew	N/M
	\$'000	\$'000 techniques/ Significant unobservable inputs 9 Option model Equity volatility

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

10. ASSETS AND LIABILITIES MEASURED AT FAIR VALUE (CONTINUED)

d. Valuation of Level 3 financial assets and liabilities recognised at fair value on a recurring basis (continued)

31 December 2024			
	Fair value \$'000	Predominant valuation techniques/ Significant unobservable inputs	Range (2) (Averages)(3)
LIABILITIES			
Net derivative and other contracts: (1)			
- Equity	(3,929	9) Option model	
		Equity volatility	17% to 48% (28%)
		Equity volatility skew	-1% to 0% (0%)
Debt and other borrowing	s:		
- Issued Structured Notes	(7,538	3) Option model	
		Equity volatility	19% to 25% (23%)
		Equity volatility skew	0% to 0% (0%)

⁽¹⁾ Net derivative contracts represent trading financial liabilities – derivative contracts net of trading financial assets – derivative contracts.

- Volatility: The measure of the variability in possible returns for an instrument given how much that
 instrument changes in value over time. Volatility is a pricing input for options, and, generally, the
 lower the volatility, the less risky the option. The level of volatility used in the valuation of a particular
 option depends on a number of factors, including the nature of the risk underlying that option, the tenor
 and the strike price of the option.
- Volatility skew: The measure of the difference in implied volatility for options with identical underliers and expiry dates but with different strikes.
- 2. Sensitivity of fair values to changing significant assumptions to reasonably possible alternatives

As detailed in note 2, the valuation of Level 3 financial instruments requires the application of critical accounting judgement, involving estimations and assumptions and it is recognised that there could be a range of reasonably possible alternative values.

The Company has reviewed the unobservable parameters to identify those which would change the fair value measurement significantly if replaced by a reasonably possible alternative assumption.

In estimating the potential variability, the unobservable parameters were varied individually using statistical techniques and historic data. The potential variability estimated is likely to be greater than the actual uncertainty relating to the financial instruments as any diversification effect has been excluded.

⁽²⁾ The ranges of significant unobservable inputs are represented in percentages.

⁽³⁾ Amounts represent weighted averages except where simple averages and the median of the inputs are provided when more relevant.

NOTES TO THE FINANCIAL STATEMENTS Six months ended 30 June 2025

10. ASSETS AND LIABILITIES MEASURED AT FAIR VALUE (CONTINUED)

d. Valuation of Level 3 financial assets and liabilities recognised at fair value on a recurring basis (continued)

The following table presents the potential impact of both favourable and unfavourable changes, both of which would be reflected in the condensed interim statement of comprehensive income:

	30 Jun	e 2025	31 December 2024 ⁽²⁾		
	Favourable changes	Unfavourable changes	Favourable changes	Unfavourable changes	
	\$'000	\$'000	\$'000	\$'000	
Trading financial liabilities:					
Net derivatives contracts ⁽¹⁾	N/M	N/M	(465)	328	
Debt and other borrowings:					
Issued structured notes	_	_	(349)	208	
		_	(814)	536	

⁽¹⁾ Net derivative contracts represent trading financial assets – derivative contracts net of trading financial liabilities – derivative contracts. The reasonably possible alternative assumptions are applied to derivative assets and derivative liabilities separately when assessing potential variability of the fair value measurement.

e. Assets and liabilities measured at fair value on a non-recurring basis

Non-recurring fair value measurements of assets and liabilities are those which are required or permitted in the condensed interim statement of financial position in particular circumstances. There were no assets or liabilities measured at fair value on a non-recurring basis during the current or prior year.

11. ASSETS AND LIABILITIES NOT MEASURED AT FAIR VALUE

For all financial instruments not measured at fair value, the carrying amount is considered to be a reasonable approximation of fair value due to the short term nature of these assets and liabilities.

12. EVENTS AFTER THE REPORTING PERIOD

There have been no significant events since the reporting date.

⁽²⁾ The difference between the total favourable and total unfavourable changes is primarily a result of net derivative contracts classified as Level 3 in the fair value hierarchy hedging issued structured notes which can be classified as either Level 2 or Level 3 in the fair value hierarchy.
